MEXICAN LIVING ROCK

Ariocarpus fissuratus

This curious Cactus could hardly look less like a living thing. It is a thrill to see the dainty, lovely pink blossoms suddenly appear among the horny tubercles. The tough, leathery skin is brown through which the underlying green shows faintly. The root is thick, surmounted by a flat head of triangular tubercles, fissured and warty, each with a central woolly groove. The top of the plant is filled with grey wool from which the flowers emerge. It will generally flower for you the first year in the early autumn. Give it a very sandy soil or best, pure sand and place in a sunny window. Water only when dry. Large flowering specimens, 75c. Mature flowering, 1 1/2 to 2 1/2 inches, each..... 50c

TO OUR PATRONS:

Our new Diamond Jubilee Handbook of Cactus Lore will be ready in the Fall. 48 pages of information and listings. Send for your copy now. Price 50c

1950

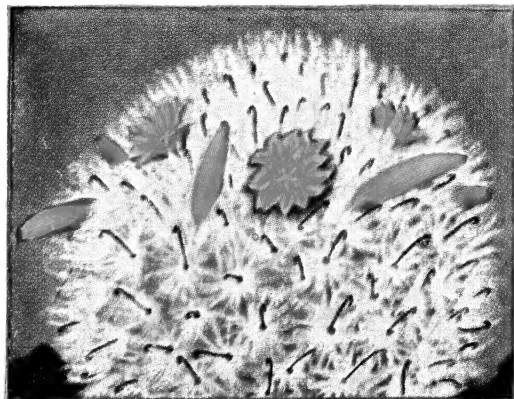

CORAL CACTUS

Mamillaria Hederi

The Coral Cactus is one of the prettiest of all with its coral red berries and pretty cream blossoms. The berries break forth ripe and red, taking only a day or so to appear, as they mature within the plant from the earlier blossoms. Often there will be a dozen of these brilliant fruits forming a glowing crown. It grows easily, liking a sandy soil and a sunny window ledge. Mature flowering specimens, 2 to 3 inches..... 50c

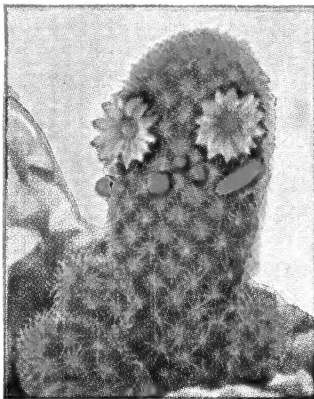

JOHNSON CACTUS GARDENS

Nurseries at PARAMOUNT, CALIFORNIA

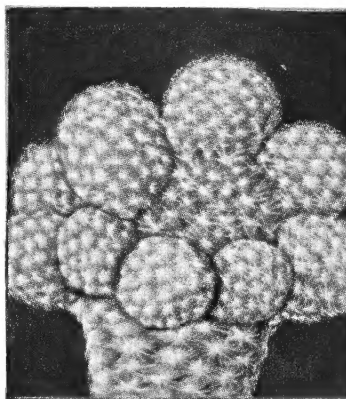

POWDER PUFF (*Mamillaria bocasana*)

Like a bursting cotton ball! Snow white hair instead of spines. Cream colored flowers and bright fruits. A jewel among cacti. Very easy to grow. 2-inch flowering specimens, 50c; flowering, 35c..... 25c

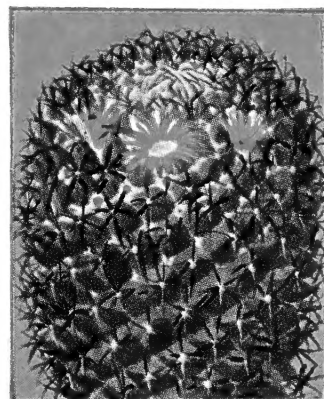

LADY FINGERS

A dainty gem. *Mamillaria elongata* Schmollii is a bright mosaic of golden, harmless spines. Small clusters, 35c. Single heads..... 25c

THIMBLE CACTUS

Like the "Old woman who lived in a shoe" *Mamillaria fragilis* has more children than she knows what to do with. Nice..... 25c

RUBY DUMPLING

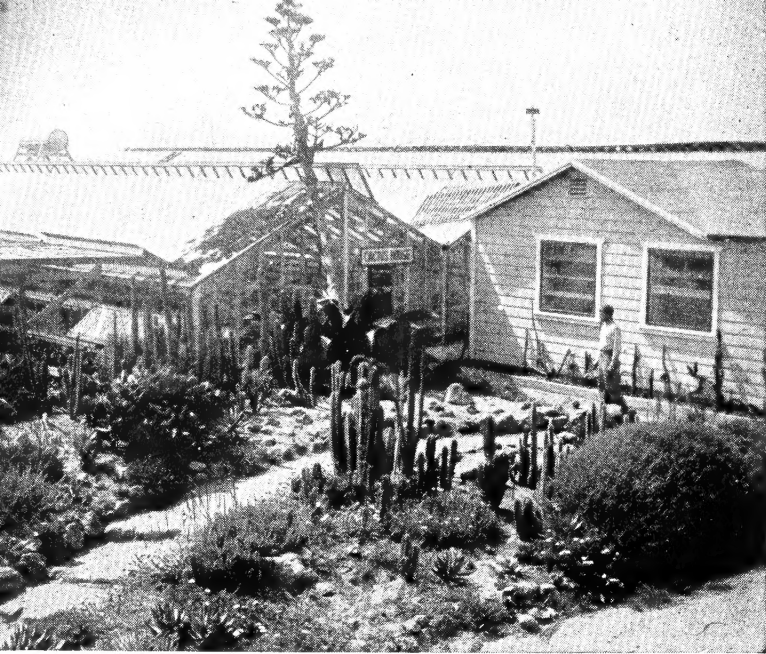

Quick growing *Mamillaria tetra-cantha* has a hoary head from which the bright blossoms emerge. Nice plants 35c and 25c

Mexican Jewel Collection No. S1. The above 4 plants 90c

LATEST NEWS LIBRARY RECEIVED from FEB 28 1950 U.S. Department of Agriculture CACTUS LAND

PRICE 10 CENTS

THIS handbook of cactus lore describes part of the largest available collection in the world. In our collection are most of the known genera with many rare and new species. It is the result of 40 years of steady collecting and exploration. New plants are continually being received and propagated to be offered in the future. For those interested in more information about Cacti and Succulents and in a greatly extended listing of plants I refer you to our new Diamond Jubilee Cactus Hand Book, which will be ready in the Fall. Price..... 50c

PART OF DISPLAY GARDEN

OUR GARDENS are open to visitors throughout the year from 8 A.M. to 5 P.M. daily. You are free to inspect the greenhouses, lathhouses and other growing facilities at your leisure. During Spring and Summer many cacti are in flower and in the Fall many South African succulents are to be seen in bloom. Paramount joins North Long Beach and is about 3 miles east of Compton. The nurseries are at 16613 So. Garfield Ave. Approximately 15 miles south-east of Los Angeles. Phone Metcalf 3-1515.

Visitors are also invited to see our Water Gardens, where thousands of lovely Water Lilies may be seen in Summer. We have one of the largest collections of these brilliant flowering aquatics in the world.

OUR POLICY

As specialists, we feel we can give you the largest selection of cacti and succulents to be found anywhere in the world. Our collections contain most of the more common plants and a great many rare and unique items seldom seen or newly discovered. One of the great difficulties is to catalog these as quantities are often limited. Our new Cactus Handbook offered above will have many of these items.

It is our desire to give you not just a plant with a label but a well grown plant in several price sizes. Our growing equipment is extensive, with 1,500,000 plants in all stages from seedlings to flowering specimens. Since seed is seldom to be purchased we must grow our own, a slow and expensive process when hundreds of varieties must be hand pollinated.

We prepay postage on orders of \$2 or more and guarantee safe delivery in the United States and Canada.

AERIAL VIEW OF OUR GARDENS

Aerial view of our 10 acres of specialized nurseries. In the foreground are lathhouses, glass covered frames and greenhouses, the physical equipment necessary to produce the large quantities of cacti we are sending to the four corners of the world. To bring you vigorous sun ripened plants, with their large healthy root systems, we grow them in these covered frames, where they get the full benefit of the sunlight and sun warmth. This well matured growth produces an abundance of flowers on quite small plants. Often they are in bloom when you receive them.

In the rear are the acres of pools in which our Water Lilies are grown. There you may see our glorious blue African lily, "Blue Triumph," the finest of all for any garden pool, large or small. Catalog on request.

ORDERS ACCEPTED NOW FOR THE NEW DIAMOND JUBILEE

CACTUS HANDBOOK

OUR new Cactus Handbook will be ready in the Fall of 1950. It will be more than a catalog, for in it we will encompass as much of the lore of cacti and succulents as its pages will hold. These interesting plants have intrigued collectors and botanists for over 300 years, and as we know more of them the interest continues to increase. My own travels in South and Central America brought to light many new things and others are continually adding to the total.

Cultural Directions will be given special attention, particularly those groups which we have found, through long correspondence with our customers, have given trouble. Notes on the countries where the plants are found, on their habitats, and on how they react under garden conditions. How and when and how much water. Wintering plants in the house. How and when to rest them and the most important thing—why. Soil mixtures are discussed and the relationship between soils and mode of culture. Our listings of plants will be much more complete than ever before. 48 pages of photographs and color to be mailed on publication. Price..... **50c**

SEVENTY-FOUR YEARS OF SERVICE

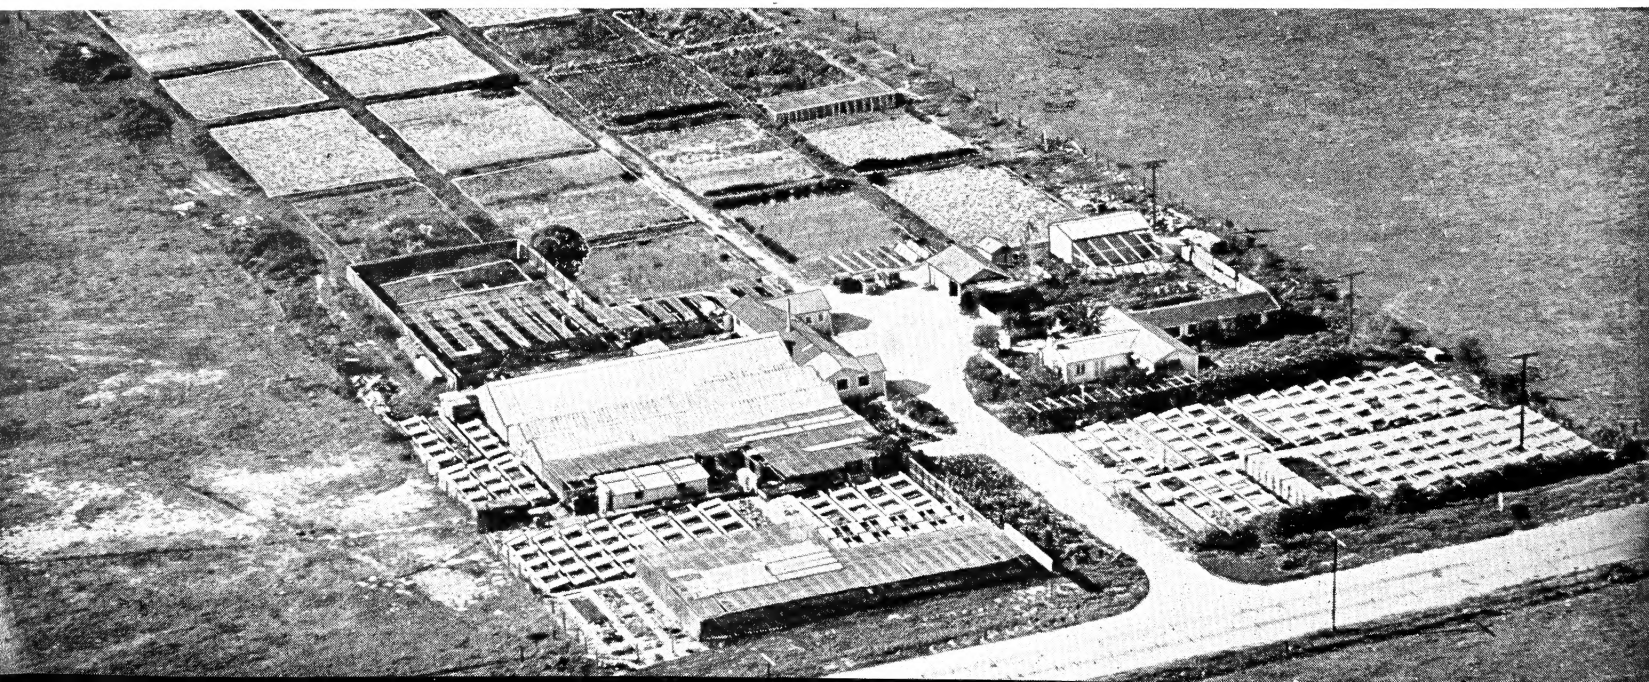

Our nurseries were started in Bordentown, N. J., in 1876. In 1894 they were removed to Hollywood at the entrance of what is now the Fern Dell of Griffith Park. In 1921 they were moved to our present site in Paramount. Our family experience in growing and shipping plants has extended over three generations. Our greatest assets are satisfied customers.

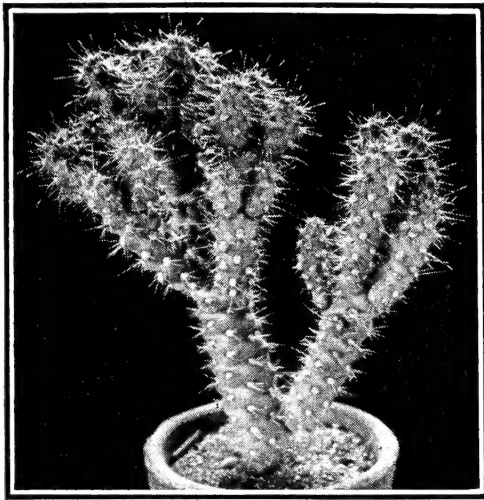

TO OUR PATRONS

This year our supply of plants is larger than ever and we feel sure you will find the quality of the best. Our new equipment has more than proved its worth. Much against our will this 1950 catalog is smaller than for many years. Our prices are at the 1935 level, the quality and service much better. Parcel Post charges have greatly increased, particularly on small parcels. Our fixed costs are approximately 2½ times the old level. Scientific quantity production can no longer absorb these increases. Rather than raise prices or reduce quality we reduce the size of the listings here and offer our new Handbook for those who wish a larger selection. Those who have 1949 catalogs may order from them.

Sincerely,
HARRY JOHNSON.

DWARF TREE OPUNTIA

Grows as a tiny, well branched tree. *Opuntia villosa* grows under almost any conditions. A Mexican species doing well in sun or shade. Well branched, each..... **25c**

Opuntias

OPUNTIAS and their close relatives form a most interesting group for the window garden. They are very "cactusy" looking and grow most easily. They make attractive subjects for dish gardens. Some have flat pads, others are round. None that we offer bear sharp spines.

Culture. They like a loose, sandy soil, and if so planted may be watered regularly, but don't keep them wet. Wetness is the foe of almost any kind of house plant. They grow easily from cuttings.

SPRUCE CONES. Pictured below at right. A most interesting novelty recently introduced. These weird looking, jointed cacti are practically spineless, grey-blue in color and look much like the cones of Spruce. They are related to the Paper Spine. A fine new plant to add to your collection. 2-inch to 4-inch. Each..... **45c**

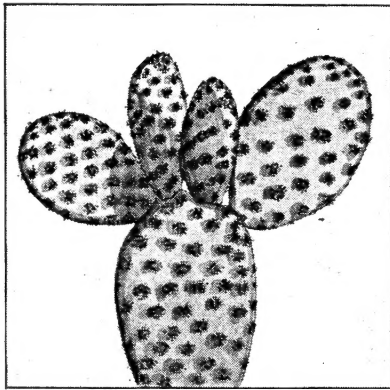

Paper Spine Opuntia. *Tephrocactus glomeratus*. We have some particularly handsome clean specimens with beautiful white, curling, papery spines. Really de luxe. Every collection should have one of these fine plants. Each..... **35c**

Old Man Opuntia. *Opuntia vestita*. An Andean species bearing long, white woolly hairs, giving its stems a venerable appearance. This choice specimen grows easily and is one you should have. Nice plants, 5-inch to 8-inch, **35c**. Smaller, 3-inch, each..... **25c**

RIBBON CACTUS

Bears stiff, curling brown ribbons instead of spines. *Tephrocactus Turpinii* makes fine specimens, quite different from most cacti. See photo at right..... **50c**

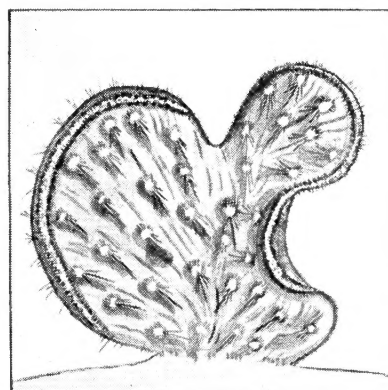

CINNAMON CACTUS

Opuntia rufida branches freely. The glochids are rich cinnamon brown against the dark green pads. Grows easily and is much used for dish gardens. Nice branched plants, each..... **25c**

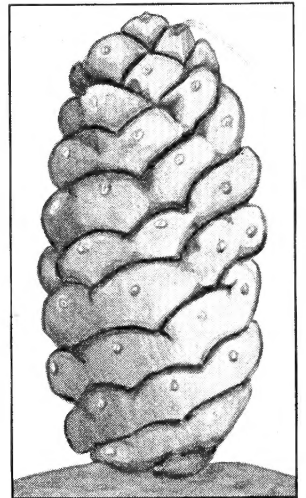

LEMON VINE

Though a true cactus, it bears large shining green leaves and waxy, lemon scented, white blossoms. *Pereskia aculeata* is a vine and is often used as a stock to graft Xmas Cactus. In shipping they often lose leaves. This does not hurt them. Potted..... **30c**

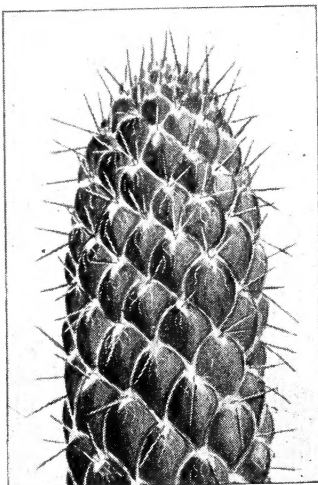

CRESTED OPUNTIA

Crested forms of cacti are among the most interesting of all. *Opuntia serpentina cristata* never loses its cockscomb growth. Splendid. 2-inch to 3-inch crests, each..... **35c**

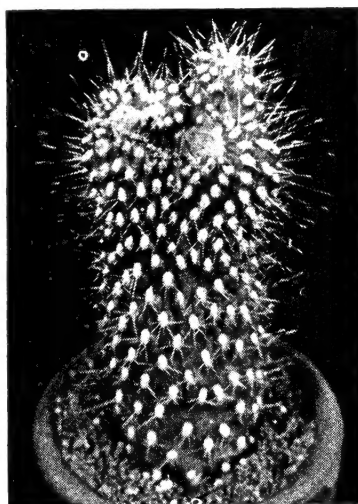

SPRUCE CONES

One of the most intriguing novelties I have seen. The curious cone-like joints of *Tephrocactus strobiliformis* look like some weird growth from Mars. The smooth cones have sunken areoles. Very pretty. Nice plants, 2-in. to 4-in..... **45c**

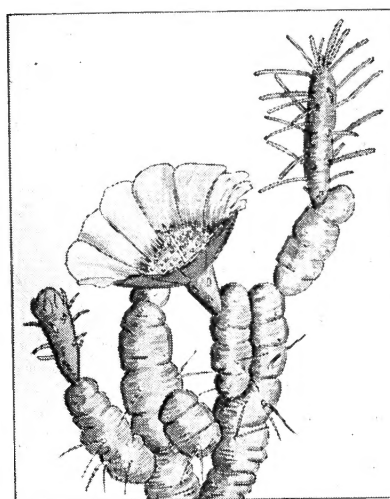

DEVILS CANE

Opuntia cylindrica. 2-inch to 4-inch..... **25c**

BOXING GLOVE

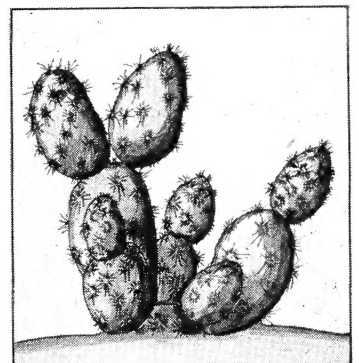

The odd *Opuntia mamillata cristata* starts with a round stem which crests out into the most bizarre shapes imaginable. A most interesting and easily grown form. 2-inch to 3-inch, each..... **25c**

OPUNTIA VERSCHAFFELTII

An uncommon small, tree-like species without spines, from Bolivia. The young growths bear true leaves. Flowers red. A choice species. 3-in., each..... **35c**

Opuntia teres. A choice branching species. 3-in. to 4-in., each..... **30c**

THIMBLE TUNA

A pretty, dwarf, round stemmed species with bright crimson flowers forming interesting, small clusters. A native of southern Peru. *Tephrocactus sphaericus* is easily grown. Small clusters, each..... **35c**

Winter Hardy Opuntia. *Opuntia polyacantha*. From Wyoming. Forms small clusters and bears yellow flowers. For outdoor planting. Each..... **25c**

At left.

DOLLAR CACTUS

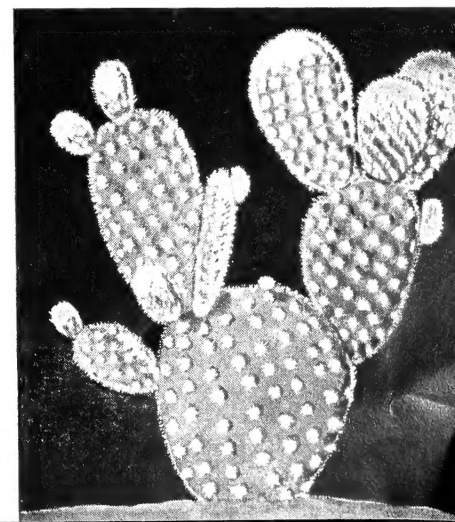

Circular blue-powdered pads and really handsome large yellow blossoms with a red eye. Almost spineless and extremely free in flower. Moderate sized plant. Give it plenty of sun, a sandy soil, and when growing a little Cactus Food to give it the vigor to blossom. Each..... **35c**

At right.

ANGEL WINGS

One of the loveliest of recent introductions. A dainty plant covered with cottony white glochids that do not stick! It branches freely, making a quaint small specimen. Charming..... **25c**

Honey Tuna. Pretty variety with honey colored glochids. **30c**

ORCHID CACTI

ORCHID CACTI or Epiphyllums bear the showiest blossoms of all cacti. The flowers are very large, from 5 to 10 inches in diameter, and in the brightest pink, violet, orange, white and vivid bicolors imaginable. They bear no spines, as they are not desert plants, but are found growing on trees and rocks along with Orchids and Bromeliads. They have been vastly improved in color and size in recent years. The flowers now last several days and even Orchids pale beside their glorious coloring. The delicate petals are like satin, the colors fresh and brilliant. They vary considerably in shape. Some starry, others bowl shaped, with wide overlapping petals.

Culture. In general they should be treated very much as one would ferns or begonias or even geraniums. This is understandable when one remembers they are not desert plants but native to the warm upland forests of Mexico and Central America. They enjoy a soil of gritty sand, leafmold and sandy, rich loam in about equal proportions. An average plant as shipped should have about a 4-inch pot until well established. Give plenty of fresh air, a well lighted position and water moderately when dry. Winter them cool at about 50 degrees. They flower in April and May.

GLORIA ORCHID CACTUS

A lovely and free flowering variety, brilliant red with a touch of orange. The flowers are quite large, produced in May. Like all Orchid Cacti they require a little more water than regular Cacti. Each..... **75c**

Amber Queen. Shiny deep red, inner petals orange red **75c**

Agatha. Soft, pastel pink with darker eye **75c**

Conways Giant. Huge crimson and violet **85c**

Scheherazade. Pink suffused lilac..... **75c**

Moonrise. Snowy white, outer petals saffron **75c**

Oriole. Inner petals white, outer rich yellow **75c**

PEACOCKII. A noble flower of vivid carmine red with luminescent violet blue throat. Lovely **\$1**

Scarlet Giant. Huge vivid orange scarlet, throat violet red **85c**

Sun Goddess. Brilliant burnt orange with violet eye **\$1**

DR. HOUGHTON. The finest. Outer petals red, shading to orange, the inner bordered with violet with orange center stripe. The throat of brilliant electric blue violet impossible of description. Each..... **\$1.25**

Sacuntala. Terra cotta edged with carmine with violet center stripe..... **85c**

Valencia. Inner petals lovely orange yellow with touch of violet in throat..... **75c**

Hermosus. Strikingly beautiful. Red outer petals enclosing brilliant purple throat..... **\$1**

Hermosissimus. A spectacular favorite. Brilliant red bordered by violet with luminous violet throat. Glorious **\$1**

RAINBOW TRIO

Collection No. S 2

3 beautiful Hybrid Orchid Cacti particularly selected for their brightness and long blooming season. Our selection properly named, rooted plants.

Bright Red.

Pink.

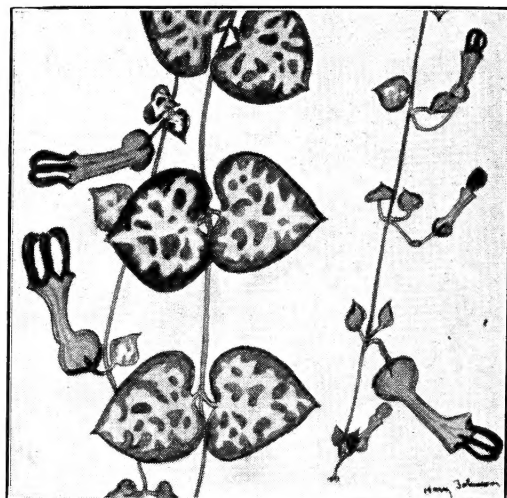

White.

Three choice hybrids..... **\$2.00**

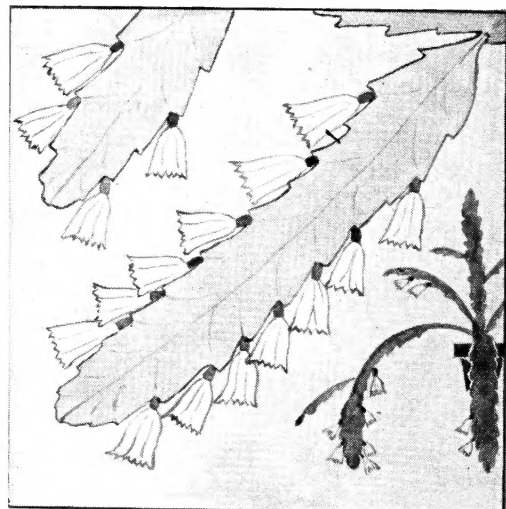

PROFESSOR EBERT

A lovely free blooming variety with flowers of bright violet carmine. A good sturdy growing plant with triangular bright green stems and quite sure to flower. Makes an attractive plant. Bold blossoms of fine form. Each..... **90c**

HEART VINE

The leaves are prettily marbled with silver. Hangs down in long trailing curtains. Ceropegia Woodii thrives in any window. Curious blossoms all the year. Springs from a small tuber. Likes moisture. Potted..... **35c**

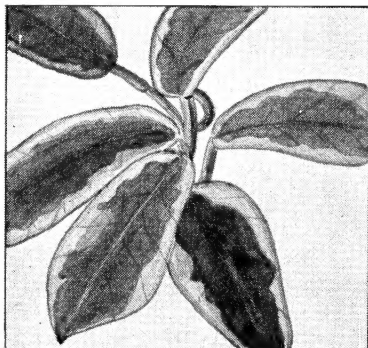

SNOWDROP CACTUS

Its arching stems are gemmed with white bells. Rhipsalis Houlettiana likes a shady location, leafmold and generous waterings. Each..... **50c**

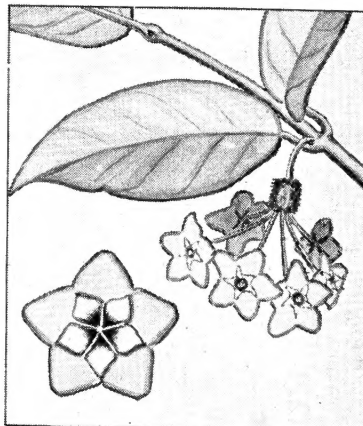

RHIPHALIS CRISPATA

The Rhipsalis make nice bush specimens. Bears white blossoms in the spring. A tree cactus native to Southern Brazil. Likes a moist shady place. There are many kinds. Each..... **35c**

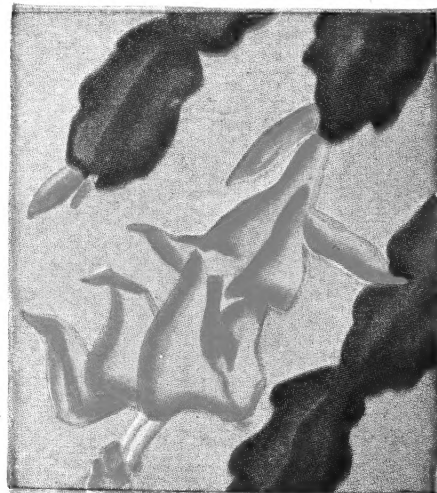

TRICOLOR WAX VINE

A handsomely variegated form of Hoya carnosa. The leaves are boldly margined with yellow, often tinged with pink. They are much sought after for dish gardens. They grow well in shady locations. Sandy loam and moisture. Each..... **\$1**

WAX VINE

Hoya carnosa bears lovely, wax-like pink blossoms and shining green leaves. Moisture and partial shade. Nice plants..... **75c**

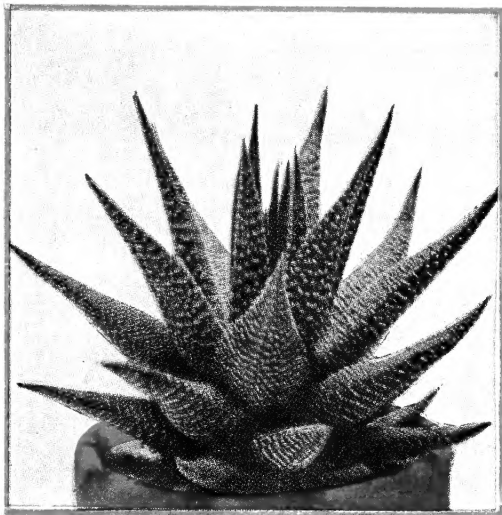

CHRISTMAS CACTUS

A lovely winter flowering cactus, well known. 3 to 5 inches, 75c. Smaller..... **50c**

Succulents

THESE colorful and fascinating desert plants are becoming increasingly popular with our patrons. Most of them are easy to grow in the window garden and none of them have spines. Succulents belong to many families of plants while Cacti belong only to the Cactaceae. They are found mostly in Mexico and South Africa. Some are popular because of their lovely or curious flowers as the Echeverias and Starfish Flowers, others because of their handsome leaves, some covered with plush, some delicately colored or powdered white and rose.

Culture. A soil of one part easily crumbled loam, two parts sand, one part leafmold is suitable, though any loam soil will do. Water only lightly when newly planted, watering again **only when dry**. Give plenty of fresh air. The more shade they are grown in the less water they will need.

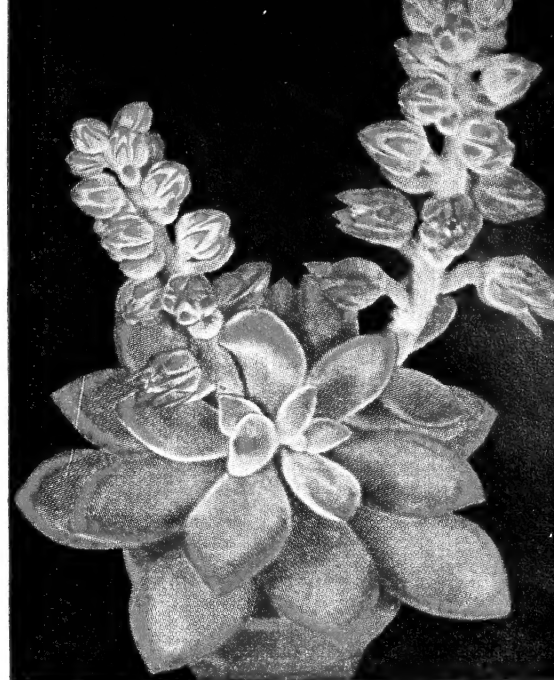

WART PLANT

The Haworthias make fine window plants. Give them a quite sandy soil and partial shade. *H. subfasciata* has small white dots on the dark green, leathery leaves. 2-3 inch, 35c. 1½ inch..... **25c**

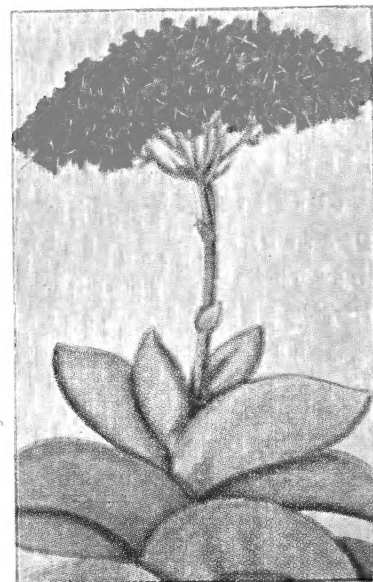

MEXICAN GEM

Close rosettes of powdered white, spoon shaped leaves. The blossoms which appear in the spring are charming. Colors are brightest when given plenty of sun. *Echeveria elegans* is from Mexico and does most of its growing in the fall. Give it a sandy soil. Very easy to grow. Each..... **25c**

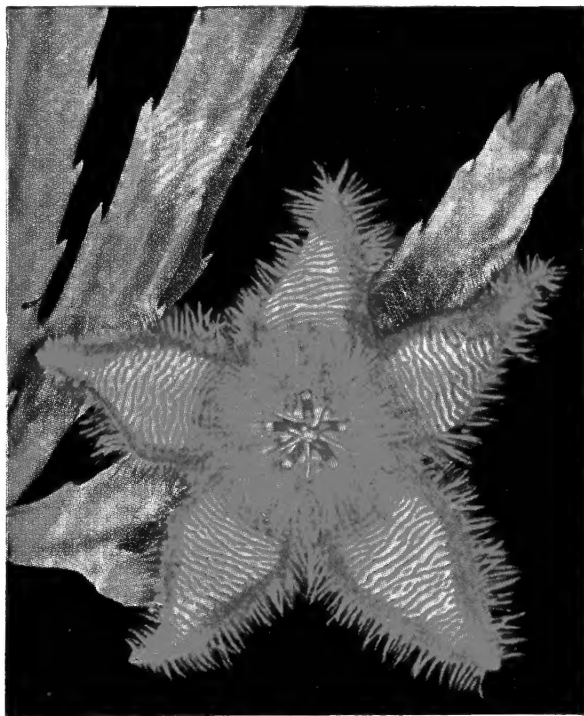

CHENILLE PLANT

Echeveria pulvinata is a dainty beauty. Order only in spring or fall..... **25c**

SCARLET PAINT BRUSH

Everyone should have *Rochea falcata*. Extremely easy to grow. 5-6 inch, 50c. 4 inch, 35c. 2 inch..... **25c**

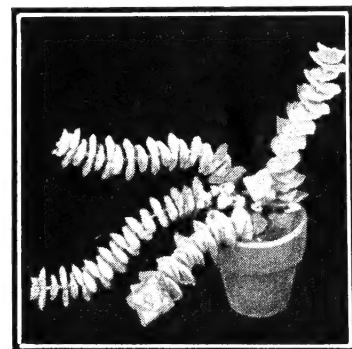

HAIRY STAR FISH FLOWER

This lovely, bright desert star is one of the most fascinating of succulents. Blooms freely the first year. Grows easily in sandy soil. Likes a little Cactus Food when growing. Give *Stapelia hirsuta* moderate water in summer. Keep rather dry in winter. A fine window garden plant. Potted.... **35c**

PAINTED LADY

A lovely late winter blooming succulent. *Echeveria Derenbergii* grows well for everyone. Blossoms are orange yellow, borne on short spikes, and several spikes appear on a plant. They make charming specimens that remain in bloom a long time. Florist shops buy thousands of them. This Mexican succulent has pretty, fat white leaves that are rimmed with red. Likes a sandy soil, moderate watering, and some summer shade. Flowering size specimens, 2-2½ inches, 35c. Small flowering size..... **25c**

NECKLACE VINE

Very attractive. Nice. 2 for..... **35c**

CURIOSITY COLLECTION No. S3. The below six plants. You will enjoy planting this easily grown group in a pot or bowl for a cheerful breakfast nook. All six..... **\$1.25**

PEANUT CACTUS

Easy to grow fast, forming many headed specimens. Flowers large, bright red. Each..... **25c**

PINCUSHION

Grows quickly in sun or part shade. Flowers when small. Each..... **25c**

BIRD'S NEST

Curling yellow spines. Long slim nipples. Flowers yellow. Each..... **25c**

RED DRAGON FLOWER

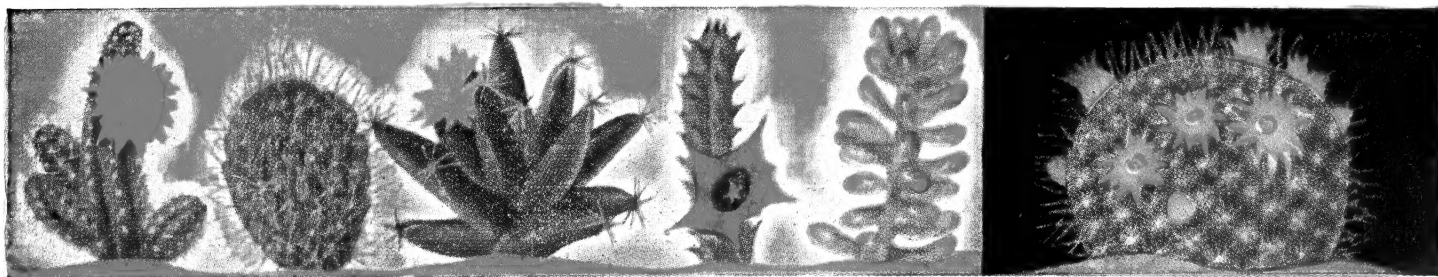

Cluster forming. Flowers red and black..... **25c**

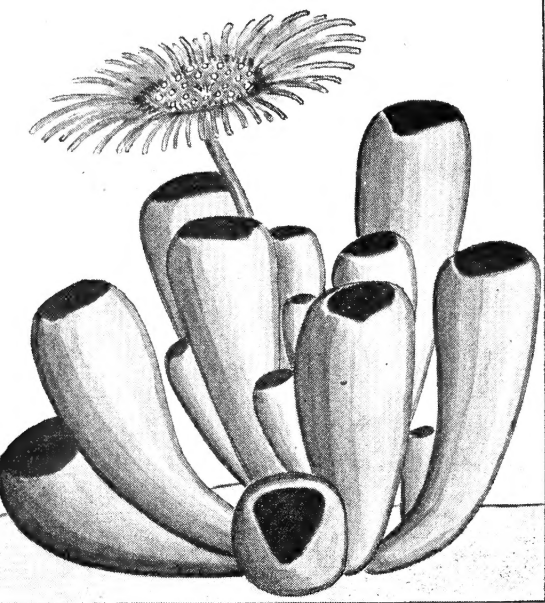

CHRISTMAS CHEER

Grows anywhere. Colors best in dry, poor soil. Each..... **22c**

FLOWERING PINCUSHION

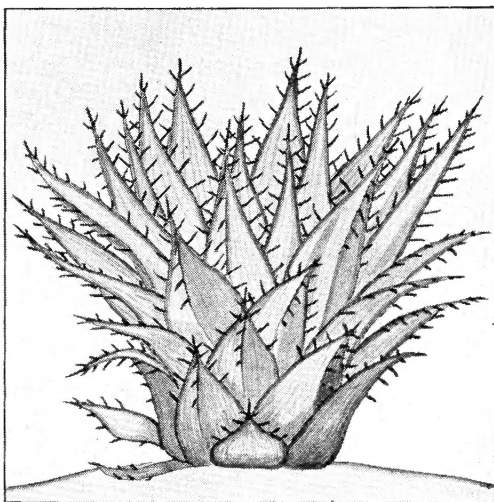

Handsome carmine flowers in spring. Easy to grow and flower. The *Mamillarias* are very satisfactory for the beginner. Nice plants, 35c. Smaller..... **25c**

BABY TOES

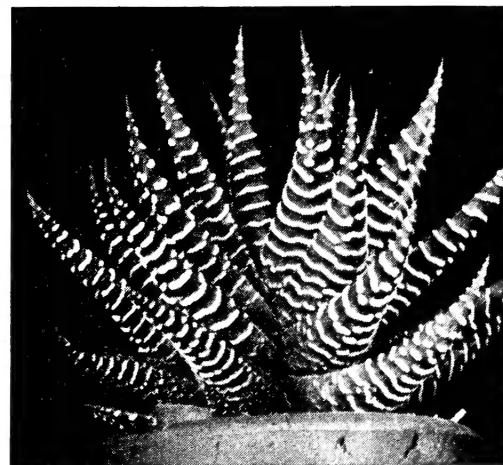

An odd "window plant" with pretty snow-white blossoms. Each leaf of *Fenestraria* has a clear window at the tip. **Cultural instructions** sent with each plant. These are real curiosities and a source of unending interest. Full sun. Potted, each..... **40c**

LACE HAWORTHIA

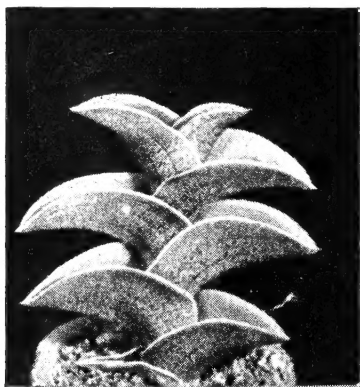

The lacy effect of *Haworthia setata* is produced by the white bristly teeth. The leaves are lined with transparent windows. Easily grown in quite sandy soil, moderate watering, partial shade. Keep dry in July and August. Each 50c and..... **35c**

ORANGE BABY TOES. *Fenestraria aurantiaca*. Potted **50c**

ZEbra HAWORTHIA

The charming *Haworthia fasciata* is much sought after because of the pearly white raised white lines banding the pointed, leathery leaves. All the *Haworthias* like quite sandy soil, never want to be kept too dry. A little Cactus Food is a help. Each..... **35c**

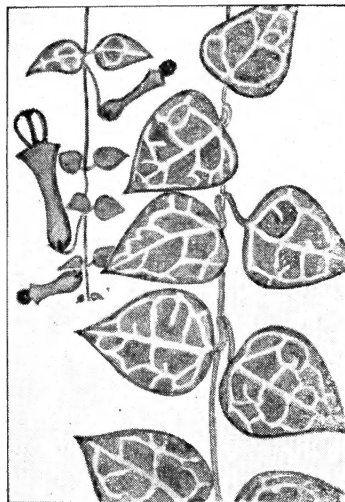

CHAIN PLANT

Each **25c**

DESERT ROSE

Trichodiadema densa **35c**

CEROPEGIA BARKLEYI

A trailing, small vine with variegated leaves. Easily grown. Likes moisture. Partial shade. Related to the Heart Vine. You will like it. Potted..... **35c**

FLOWERING SUCCULENTS

Collection S 4

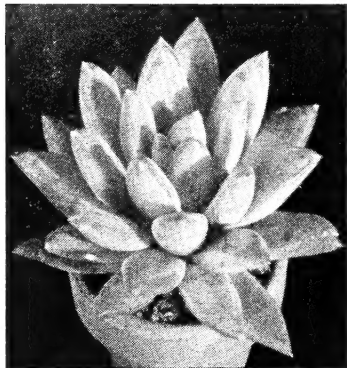

A simple, easily grown assortment of easily flowered succulents for the window garden. They are plants everyone enjoys. Planted together they make an attractive dish garden. **Painted Lady, Silver Chenille, Tiger Jaws and Scarlet Paint Brush.**

All 35c sizes **\$1**

BURRO TAIL

A lovely plant whose lambent, pendulous tassels of palest silver have won it a place in the choicest collections. Very easy to grow, *Sedum Morganianum* makes perfectly glorious specimens, the tassels reaching 3 feet in length. Likes moisture and a cool rather than hot situation. Each..... **35c**

PACHYVERIA GLAUCA

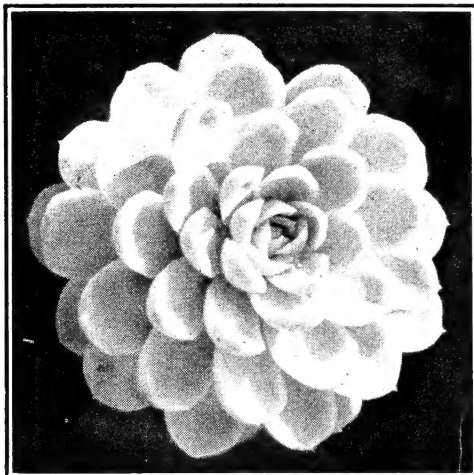

Blue White **25c**

PINK CHAIN

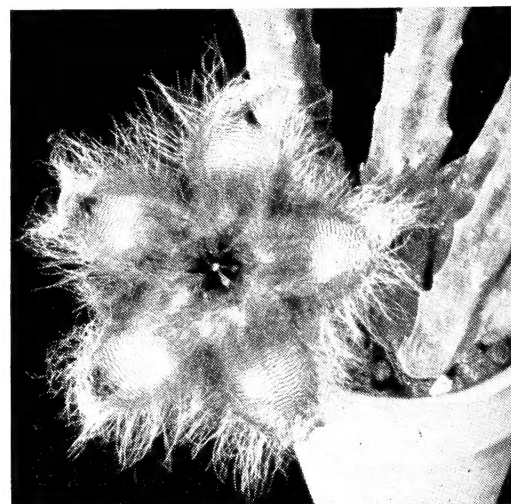

Sedum Sieboldii. Plants are deciduous and winter hardy. Lovely..... **30c**

PANDA PLANT
Below. *Kalanche tomentosa*. Each..... **25c**

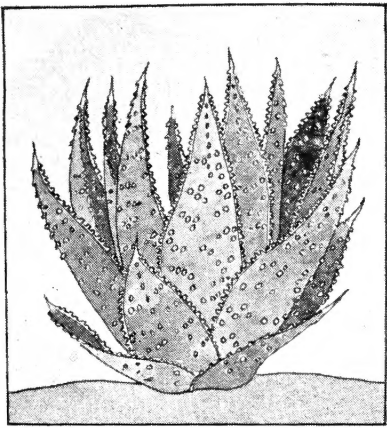

ECHEVERIA GILVA

Makes rosettes up to 6 inches across. Pale green leaves often tipped reddish. Becomes clustered. Easily grown. 35c and..... **25c**

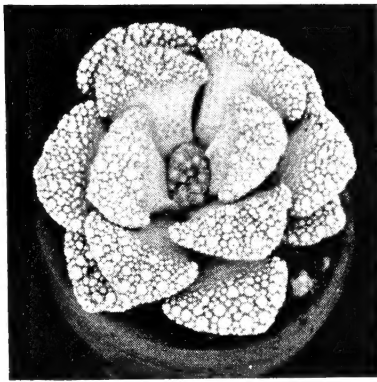

BEARDED STAR FLOWER

An exquisite almost scentless blossom. *Stapelia pulvinata* is heavily bearded with white or rosy purple hairs. Sandy soil. Moderate water. Flowers from July to October. Each..... **40c**

PEARL ALOE

Each leaf is gemmed with tiny seed pearls. Aloe Bequinii enjoys a light loam soil, partial shade, moderate waterings throughout the year. Each..... **35c**

JEWEL PLANT

A lovely mimicry plant often becoming highly colored in winter. Titanopsis calcareum likes a sunny location. Large flowering, 35c. Smaller..... **25c**

White Jewel Plant. Titanopsis Schwan-tessii. Lovely white leaves..... **35c**

BEAD VINE

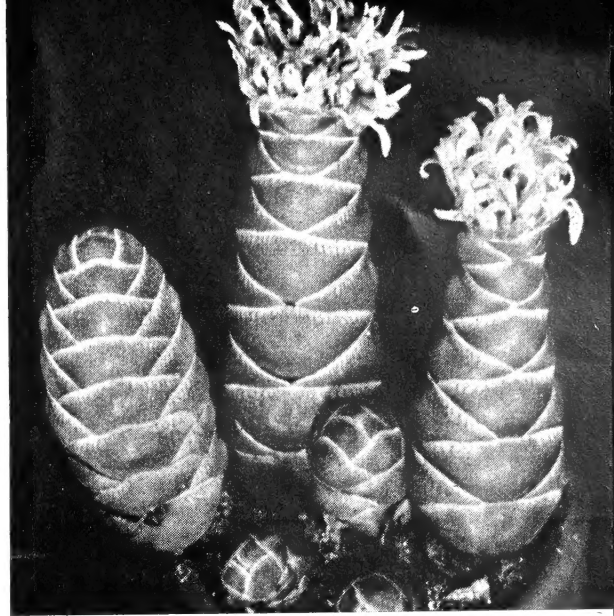

Like buttons strung on a string. Bears pretty clusters of pink blossoms. Easy to grow, attractive, curious. 2 for..... **35c**

VIOLET QUEEN

This lovely Eche-veria is white tinged with violet. A very charming specimen in any collection. Nice **30c**

CORAL BEADS

Every bead is brightest red. Every bead that falls will grow! Sedum Stahlil colors brightest in full sun. 2 for..... **25c**

RATTLESNAKE CRASSULA

The rare Crassula teres is seldom seen except in the choicest collections. It branches freely from the base, each stem eventually terminating in a cluster of white blossoms which scent the room with fragrance. It grows slowly, liking a light soil with some sand. Semi-sun and moderate waterings. Not at all hard to grow. Each..... **35c**

STONE FACE COLLECTIONS

The Stone Faces or Lithops are amongst the strangest of plants. Some are pictured below. Easily grown in a sunny window in very sandy soil or pure sand. A half dozen may be planted in a 4-inch pot. Blooming sizes.

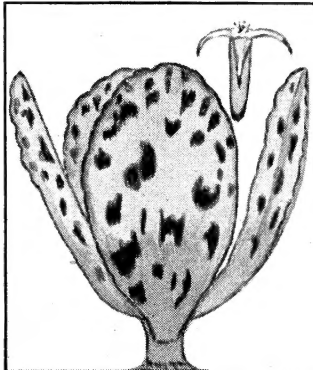

Collection S5. 6 contrasting Lithops..... **\$1.50**
Collection S6. 12 contrasting Lithops..... **2.50**

LIVING ROCK DISH GARDEN

Collection S7

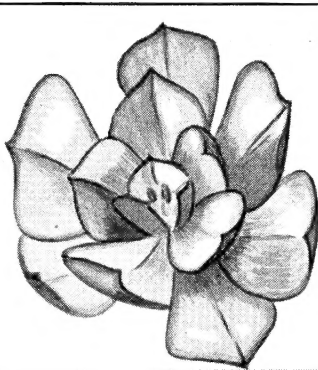

There are various kinds of Succulent Living Rocks. Treat same as Lithops. **African Living Rock, Flowering Stone, Karroo Rose, Silver Skin, Pleiospilos Hilmari, Jewel Plant, Spli: Rock.**

7 Fine Mimicry Plants..... \$1.50

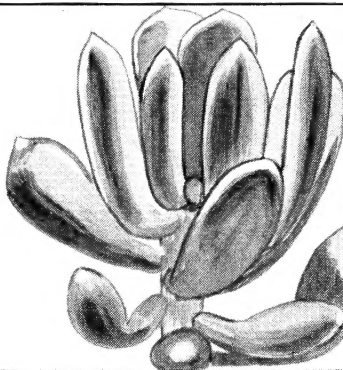

PENWIPER PLANT

An interesting succulent with heavily maroon blotched leaves. Bears a truss of fragrant white blossoms. Kalanchoe marmorata is a favorite liking reasonably sunny location to keep the colors bright. Each..... **25c**

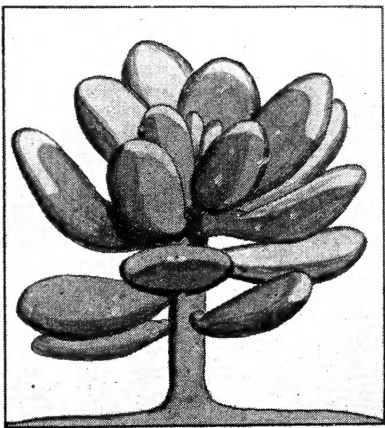

ECHEVERIA KEWENSIS

Grows into a nice specimen up to 8 inches in diameter. The leaves are blue green flushed with red. The flower spikes bloom over a long period. Nice. Each..... **25c**

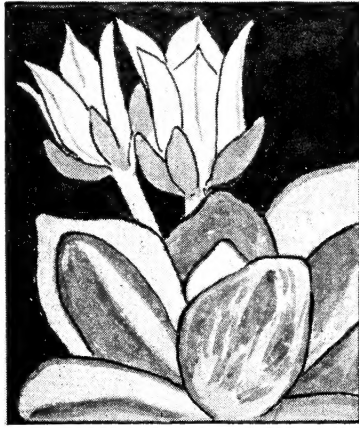

PACHYPHYTUM BLUE HAZE

A lovely hybrid making an attractive tall specimen. The leaves are blue tinged violet, the tips lighter. Likes a sunny location, moderate waterings. Pretty..... **25c**

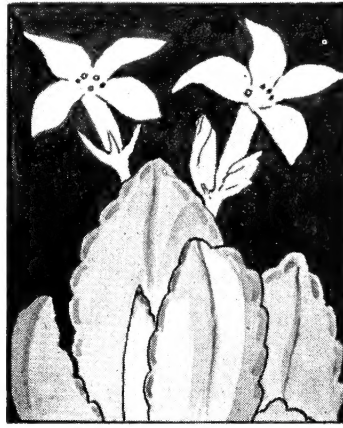

MOONSTONES

The plump white leaves are chiseled from alabaster, their glaucous surface gently suffused with lavender. Pachyphytum oviferum var. grows easily and every fallen leaf will make a plant. Does well in shade or sun and thrives on neglect. Each..... **25c**

SILVER CHENILLE

Handsome emerald green leaves with soft white hairs. In winter bears spikes of a dozen crimson bells lasting for weeks. Echeveria plumosa in flower or not is exquisite. Branches freely. Each, 35c. Smaller..... **25c**

CRIMSON KALANCHOE

Kalanchoe globulifera hybrida

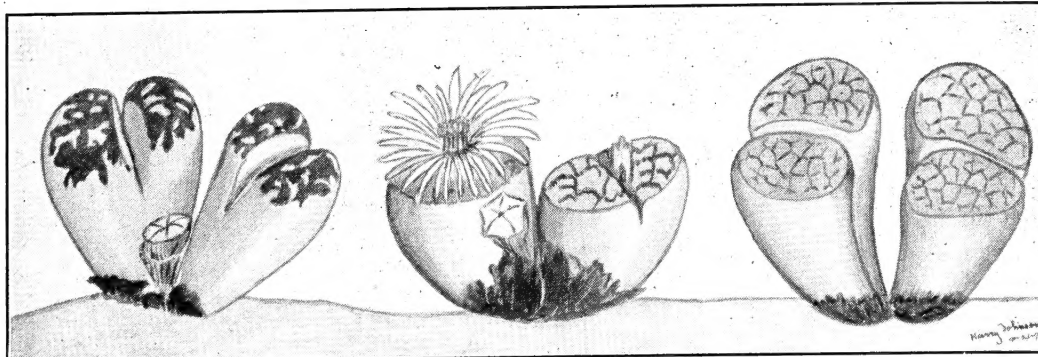

A beautiful pot plant that can be brought into bloom at Easter. Blooms over a long period. Crimson blossoms in clusters. Likes a rich soil. Each..... **25c**

"Collecting rare cacti is the most interesting hobby I have ever indulged in. I have 105 varieties. I am delighted with your plants." Mrs. Bill Harper, Cheneyville, La.

CALICO HEARTS

Adromischus maculatus will be one of the gems of your collection. Easily grown in light loamy soil, moderate waterings with some shade in hottest part of day. Beautifully mottled with maroon. Each..... **35c**

LITHOPS FRAMESII

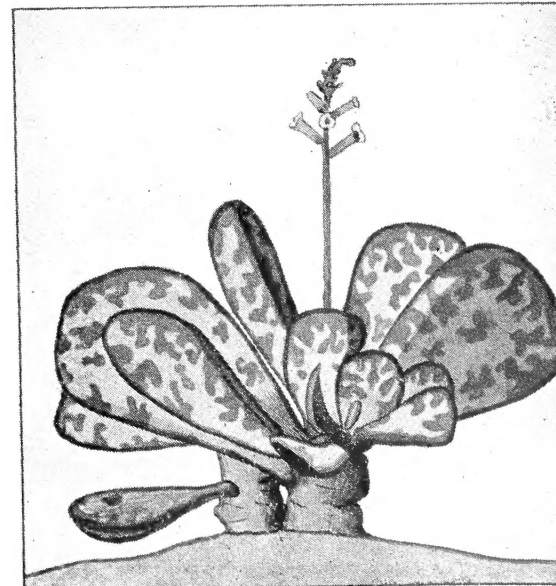

A lovely species, violet grey with darker pattern. White flowers in October. Each..... **35c**

LITHOPS URSULAE

Charming rosy tan with darker rust colored incised lines. Flowers white in Sept..... **35c**

LITHOPS FULVICEPS

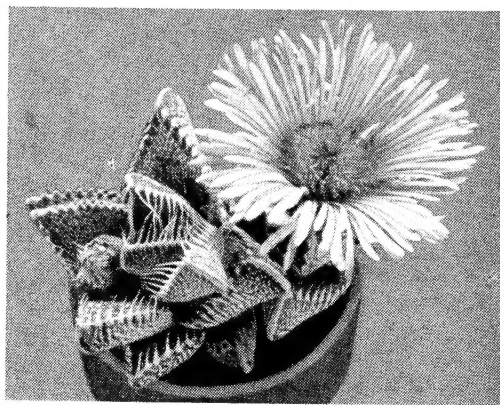

The fat rosy beige leaves have an intricate pattern of brown lines. Flowers white..... **35c**

PLOVER EGGS

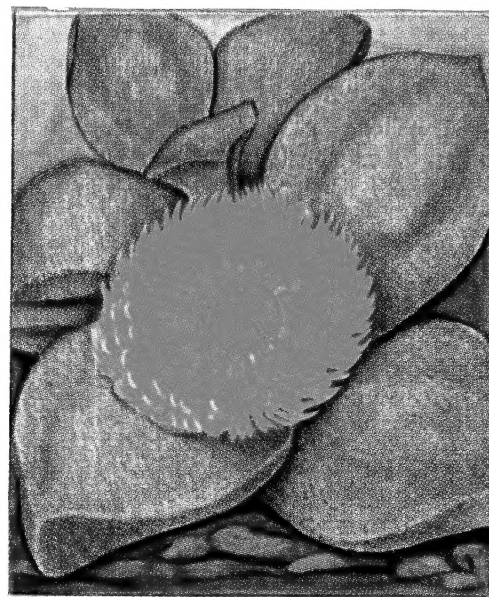

The fat round leaves of *Adromischus festus* are marbled with maroon-red. Light soil with sun to bring out the rich coloring. Each..... **35c**

SUPERB TIGER JAWS

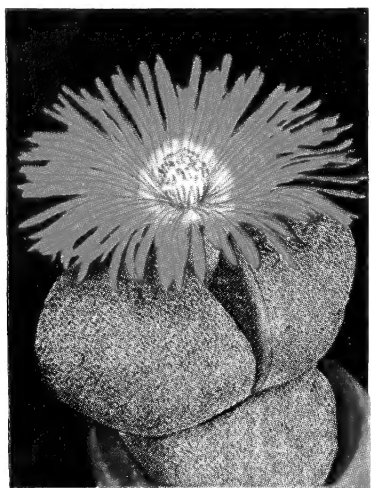

The prettiest form of *Faucaria tigrina* with blue green leaves minutely dotted white and margined with strong teeth. Easy to grow. Flowers in September. Clusters. 35c. Smaller..... **25c**

RED TIGER JAWS. Leaves tinged with red. Very attractive. Brightest in winter..... **35c**

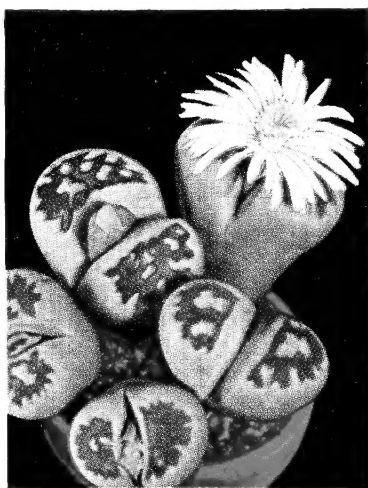

AFRICAN LIVING ROCK

Leaves like splintered granite. *Pleiospilos similans* is easily grown. Sunny location. Not too much water. Should bloom the first year. A really curious plant. Nice, each..... **25c**

SPLIT ROCK

These very curious African succulents are real mimicry plants so closely resembling the stones among which they grow as to be very difficult to find except in flower. *Pleiospilos Nelii* is easy to grow in a sunny window watering lightly when dry. Sandy soil. 1½-2 inch, 50c. 1-1¼ inch..... **35c**

LITHOPS BELLA

The Stone Faces are amongst the most curious and strange of all plants, for they imitate the pebbles among which they grow both in shape and coloration. They are also "window" plants. Some are white, others red, green or brown. They bear their bright blossoms in autumn. Sunny location. Small, each..... **30c**

WOOLLY SAND ROSE

A tiny succulent with woolly red leaves and pink blossoms. *Anacampseros tomentosa* grows in sun or shade. Each..... **25c**

THREAD SAND ROSE

A vigorous cluster forming succulent bearing large pink blossoms in late spring. *Anacampseros filamentosa*. Each..... **25c**

LAMBS TONGUE

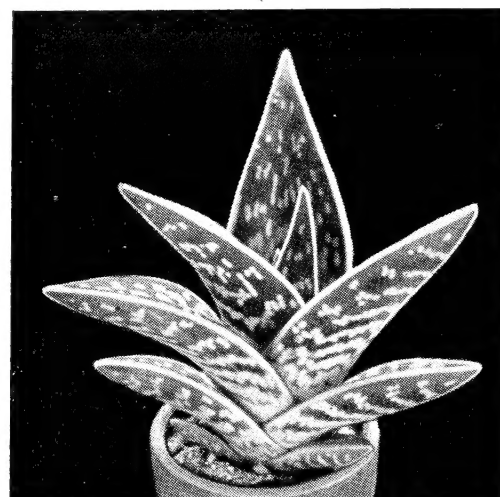

Thick grey green stippled leaves. Yellow blossoms. Each..... **25c**

KARROO ROSE

The lovely *Lapidaria* has thick, smokey white leaves flushed with rose and large golden yellow blossoms in September. Beautiful. Each..... **25c**

FOAM FLOWER

A very rare *Crassula* with lovely fragrant white blossoms. *Crassula mesembrianthemopsis* reaches 2 inches in diameter. Sunny location. Blooming size..... **35c**

TIGER ALOE

Brightly marbled green and white leaves. One of the prettiest of succulents. *Aloe variegata* bears spikes of large red blossoms in January. Sandy soil, moderate waterings. 35c and..... **25c**

CACTUS FOOD

A very effective food for cacti with a good organic base. Blended and proportioned to make normal matured growth.

12-ounce bag..... **50c**
2-pound bag..... **\$1.00**

RAINBOW BUSH

A handsome rainbow-hued plant of yellow, cream, pink and green. *Portulacaria afra* var. tricolor will stand out amongst the plainer greens. Light loam soil and generous treatment. 2½ to 5 inches. Potted..... **30c**

CACTUS SOIL CONDITIONER

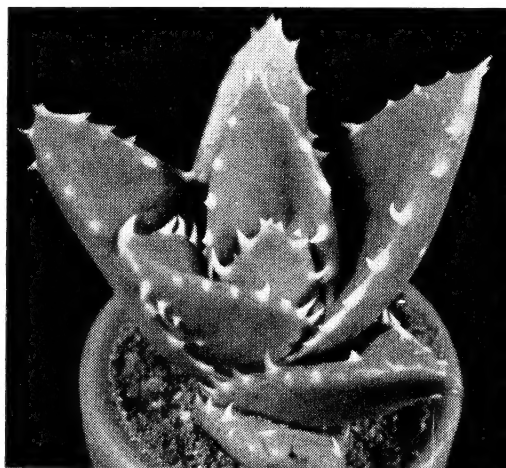

Of great assistance in keeping cacti in good health, it is designed to add minerals ordinary soils often lack. A spoonful will often bring an ailing plant back to health.

Small size, 10 ounces postpaid..... **60c**
Large size, 32 ounces postpaid..... **\$1.00**

ROOTWELL

Want to raise cactus cuttings? Try our special hormone powder for cuttings. Sterilizes and induces roots. Instructions.

Per package..... **50c**

GOLD SPINE ALOE

Golden teeth and tall spikes of red bells. Sun or shade..... **50c**

POLKA DOT ALOE

A very pretty plant. The leaves are heavily spotted with white. Bears spikes of orange yellow blossoms in February and March. Charming. Each..... **25c**

CACTUS INSECTICIDES

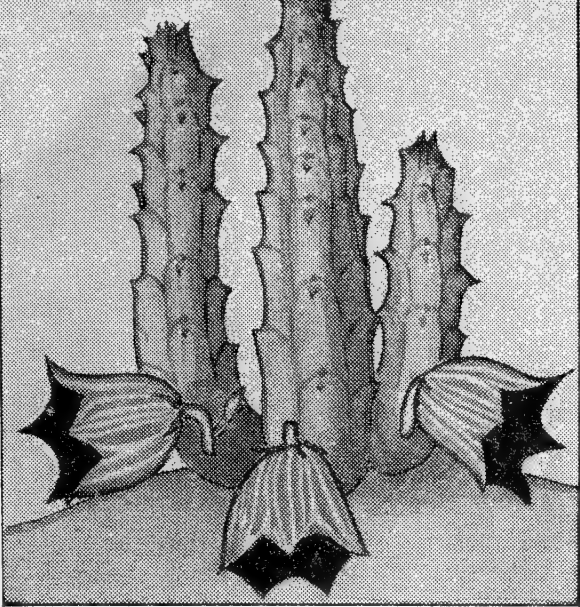

Supplies

Turn to Page 10 for Listings

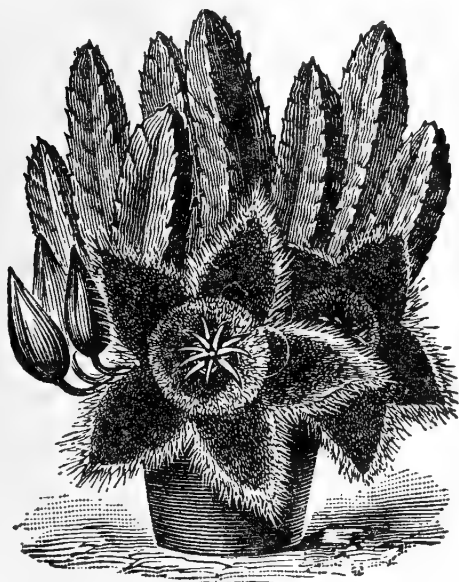

CHRIST THORN

The lovely scarlet blossoms of *Euphorbia splendens* are familiar to all. An old window garden favorite, growing easily and blooming well in any sunny window. Likes a rich sandy loam soil and a generous supply of water. Large, 75c. 10-12 inches, 50c. 6 inch..... **35c**

KENYA DRAGON FLOWER

A pretty Dragon Flower with dark crimson-red, bell shaped flowers. *Huernia keniensis* is an easy and vigorous grower and flowers from spring to cold weather. Clusters, 35c and..... **25c**

HAIRY STARFISH FLOWER

(*Stapelia hirsuta*)

Handsone, velvety purple "stars" 4 inches across each petal fringed with soft violet hairs! They grow and flower freely in small pots. Your friends will never believe these strange African blossoms are real! **35c**

The NEW SAND CULTURE for CACTI

Hydroponics is the scientific name for growing plants in culture solutions. This new science is rapidly proving its worth and for the cactus enthusiast has especial points of interest. One may grow his plants in clean porous sand, thus greatly reducing the danger of overwatering. This is of particular interest to collectors who live in damp, foggy or rainy places. Many choice or difficult plants thrive under this treatment for cactus roots when well fed enjoy spreading in the air filled sand.

VITAMIN B-1 Johnson's Own B-1 Tablets For Use in Any Soil

Works miracles on Cacti and Succulents, often bringing refractory plants into bloom. Don't fail to use this wonder working solution. Better Homes and Gardens tests on cacti report wonderful success attained in flowering slow plants. Particularly valuable to stimulate new root growth after transplanting. **75 Double Strength Tablets with Full Instructions. Postpaid. 50c**

JOHNSON'S SAND CULTURE KIT

COLLECTION H23

Complete instructions on growing Cacti and Succulents in sand with nutrient solutions. Simplifies watering. Makes the most difficult desert plants of easy culture. Particularly useful where Winters are long and damp.

Full instructions. 16-gallon package Plant Chem. 75 Johnson's B1 Tablets. 50c package Cactus Food..... **\$1.20**

CACTUS SEED

Cacti grow readily from seed which germinates in from 7 to 30 days, depending upon heat and moisture conditions. You will enjoy trying your hand at growing them. Fresh seed from our own plants. Full planting instructions with every order.

MIXED CACTI SEED

Contains more than 20 kinds, including *Mamillarias*, *Cerei*, *Echinopsis*, *Piptanthocerei*, *Trichocerei*, *Cleistocacti*, *Echinocereus*, *Echinocacti*, etc. Fresh seed. You will have fun growing them. Per packet..... **50c**

DE LUXE MIXTURE

Superb mixture made up of over 75 species of cacti and succulents. There are no weedy species included. Many are rare kinds collected from our own plants. All cacti seedlings are pretty and many bloom within two years. Put up in two packets of fine and coarse seeds. The collection..... **\$1.00**

MIXED LIVING ROCK SEED

There are many kinds of Living Rocks and we have one of the finest collections in this country. All seeds are grown by us. *Pleiospilos*, *Dinteranthus*, *Lithops*, *Lapidaria* and many others are included in this selection. Per packet..... **50c**

MINIATURE CACTI SEED

A choice mixture of the finest toy cacti, including rare *Parodias*, *Notocacti*, *Gymnocalyciums*, *Mamillarias*, *Echinopsis*, etc. Fifteen or more of the prettiest small growing types. Full instructions for planting. Per packet..... **50c**

CHOICE SUCCULENTS

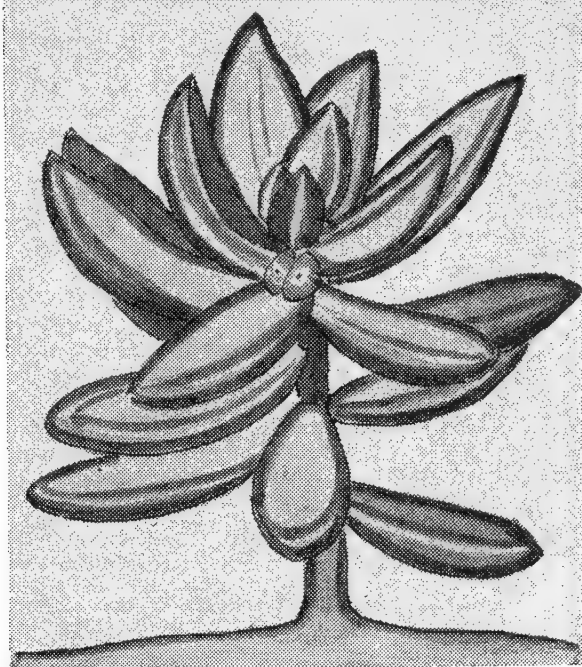

A fine mixture containing many rare species of *Mesembrianthemums*, *Crassulas*, *Cotyledons*, *Echeverias*, *Anacampseros*, *Aloes*, *Gasterias*, etc., from our huge collections. All collected from our own plants. Many interesting things. Per packet..... **50c**

The Stone Faces or *Lithops* are the prizes of any collection. These handsome, interesting and entirely novel plants germinate quickly. You will have seedlings in two weeks! Approximately 100 seeds..... **25c**

CHRISTMAS GOLD

A very pretty golden leaved plant. Very easy to grow, and leaves are always golden. In full sun they become bronze gold. Every collection should have one. Does well in good loam soil. *Sedum Adolphii* will grow well in a quite shady place. Each..... **25c**

New Bronze Hybrid. Christmas Bronze. Lovely variety with darker bronze tints. Vigorous. Each..... **25c**

STONE FACES

LITHOPS

Own a collection of these lovely *Lithops*. Your friends will not believe them real! A fine assortment may be grown in a 6-inch pan! The favorite of every collector. They do nicely in any sunny window. Give them a sandy soil, plenty of fresh air and they will bloom every autumn. The plants are from one-half to one inch in diameter, their flat tops beautifully colored and lined and closely resemble the colored pebbles among which they grow. They are real mimicry plants.

SUPPLIES for CACTI

Few things are needed in the growing of cacti more than interest and a desire to form an increasing collection of them. However, for the city dweller and more serious collector I am offering a few things that may make their culture easier. The things we offer are the things we ourselves use.

JOHNSON'S CACTUS FOOD

A very effective fertilizer with a good organic base, the ingredients of which are blended and proportioned to help your plants to make normal matured flowering growth. It is not a soluble fertilizer but should be scattered over the soil, a level teaspoonful to a 4-inch pot, three or four times during the growing season after the plants are well established.

Use only during the growing season. Light applications once a month are more effective than heavy applications.

12-ounce Bag50c

2-pound Bag\$1.00

ROOTWELL

Want to raise Cactus cuttings? Our new hormone powder for rooting refractory cuttings of all kinds designed particularly for quickly rooting Cacti and Succulents. Sterilizes the cut surface and induces luxuriant growth of roots. Apply dry with finger to fresh cut.

Full Directions. Per Package.....50c

JOHNSON'S VITAMIN B1

Works miracles on cacti, often bringing refractory plants into bloom. Don't fail to use this wonder working solution. Our customers report success, particularly when used on old plants. Also to stimulate new root growth after transplanting.

75 Double Strength Tablets, with full instructions for Cacti. Bottle.....50c

CACTUS AND SUCCULENT

SOCIETY OF AMERICA

The Cactus and Succulent Society was organized more than 20 years ago to bring together those interested in these extraordinary plants and to publish a magazine which would provide a forum for the exchange of information and for the publishing of new species and scientific data. The Journal, under the competent editorship of Scott Haselton, has well achieved these aims, and today is the world's foremost publication about these plants.

Everyone is invited to join the Society and to receive this splendidly illustrated magazine. It has many articles on new plants, stories on exploration trips to new localities, articles on culture, news of affiliated Cactus Clubs in every region of the U. S. Everyone interested in Cacti and Succulents will continue to find this a most interesting magazine.

DIAMOND JUBILEE

CACTUS HANDBOOK

This fall we are issuing our Diamond Jubilee Cactus Handbook to celebrate our 75th year in the nursery business. In it will be scores of color plates of cacti and succulents, hundreds of photographs and much information on culture such as how to water, how to rest plants, how to get them to bloom, seed raising, soils, etc. Also notes on the native lands of our plants, where cacti are found, how they are named and the general lore of cacti.

There will be listings of hundreds of interesting plants together with sizes and prices of available supplies. It has been more or less impossible in our smaller yearly catalogs to list many items that have been available in the past.

Cactus Handbook. 48 pages. Orders taken now. Ready in Fall, 1950.....50c

JOHNSON'S CACTUS SOIL CONDITIONER

Of great assistance in keeping cacti in good health, it is designed to add the minerals ordinary garden soils often lack. Desert soils are often high in mineral content, for there is little rain to leach them away. A spoonful of my Conditioner placed about a Cactus plant and stirred lightly into the soil will often bring an ailing one back to health. Mix it with your potting soils.

Small Size, 10 Ounces, Postpaid.....60c

Large Size, 32 Ounces, Postpaid.....\$1.00

JOHNSON'S CACTUS COMPOST

Mix With Your Own Sand and Soil

An economical compost for Cacti and Succulents which when mixed with equal or larger quantities of both sand and light loam makes a very suitable soil for all desert plants. Composed of our reclaimed sclerophyllous leafmold, lime, gypsum in the proper proportions for all potted cacti. A light and bulky mixture, the same as we use in our own potting soils for both seedling and specimen plants.

Per Peck, Postpaid\$1.95

4 Pints or 2 Pounds to Make 6-10
Quarts of Potting Soil. Postpaid.....75c

OUR SPECIAL CACTUS LEAFMOLD

A reclaimed, sclerophyllous desert leafmold, sifted, light and dry. Mixed with equal parts of both sand and loam, it makes a fine, economical cactus soil.

4 Pints or 2 Pounds to Make 6-10
Quarts of Potting Soil. Postpaid.....70c

HARDWOOD CACTUS CHARCOAL

Useful in keeping cactus soils sweet and aerated. Helpful in heavy soil.

Per Quart40c

CACTUS INSECTICIDES

Our special instruction sheet describing common cactus pests and treatment, with spray formulas. We recommend Red Arrow Spray as effective and non-injurious to cacti or other house or garden plants.

Instruction Sheet and Bottle of Red Arrow
Spray. Postpaid40c

VOLCK SPRAY. An oil spray recommended for any kind of scale insect and for mealy bug. These two insects are hard to kill as they have a waxy covering which repels water. We have used it for years, but only recently has it been put up in small bottles. 4-ounce bottle prepaid (with orders only) with chart describing cactus pests. Full instructions for use.....50c

BLACK ROT PREVENTIVE

With light waterings, fresh air and sun, rot will not appear. If through too much watering plants turn black and watery its spread may be checked by saturating the top soil with a Semesan solution. It is useful also to spray tiny seedlings to prevent "damping off" or rotting.

1/3-ounce envelope, with cactus instructions20c

2-ounce pkg., with cactus instructions.....50c

PLASTIC PLANT LABELS

You may write with pencil on these labels and it will remain clear for years. As near a permanent label as I have tried.

Pure white, 6-inch, pot labels, per 100..\$1.75

PLANT CHEM SALTS

Cacti grown in pure sand and watered regularly with this nutrient solution make healthy vigorous growth. An occasional watering of all your house plants will supply the rare minerals sometimes lacking.

16-gallon pkg., with full instructions.....30c

100-gallon pkg., with full instructions..\$1.10

CEREUS

and its ALLIES

INCLUDED in this large section of the Cactus Family are all the tall growing kinds, most of the climbing kinds as well as many clustering and creeping varieties. Some of the giant Cerei tower upwards for more than 50 feet and weigh many tons, others are so tiny one's thumb dwarfs them. They are mostly found in the warmer regions from Arizona to Argentina. The flowers of some are gloriously beautiful, huge chalice sparkling in the morning sunlight. The climbing varieties such as the Queen of the Night often grow in jungles, climbing in the trees, opening their chaste blossoms in the airy lofts high above the forest floor. The giant tree Cerei grow in scattered groves. In the Andes they linger in the valleys at 12,000 feet.

Culture. The Cerei are at home in the window garden. Generally they have well developed root systems and take kindly to such care as you may give them. They like a good sandy soil, sun or part sun and watering whenever dry. Let them dry out between waterings. Give plenty of fresh air.

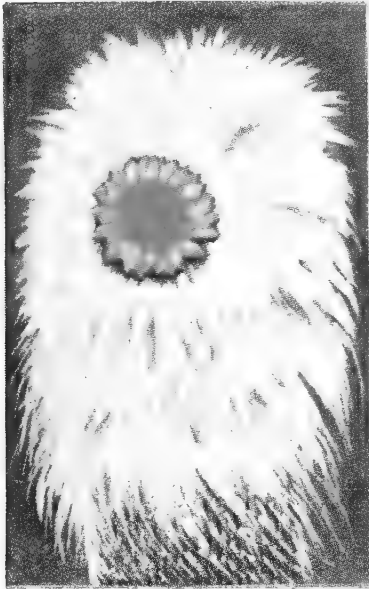

SCARLET BUGLER

You will want this pretty Cleistocactus Baumannii. It may grow to two feet tall and bears its tubular bright red flowers all summer long. 12 to 15 inches 75c. Smaller 35c and..... 25c

JOSEPH'S COAT

Handsomely variegated with white, yellow, green and pink. This favorite is easy to grow. Opuntia monacantha variegata likes a porous loam, sun or partial shade, moderate waterings. 35c and..... 25c

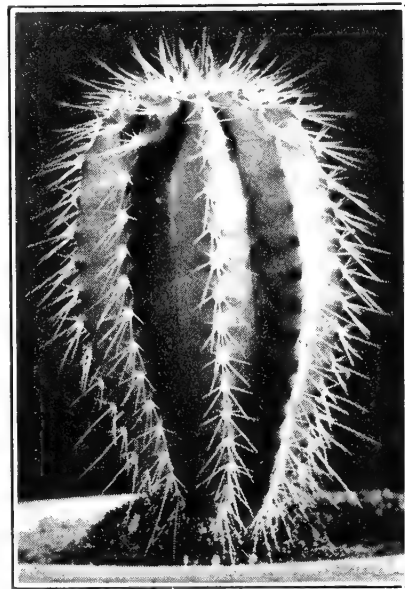

OLD MAN CACTUS

The long snowy white hair of the venerable Cephalocereus senilis makes it one of the most sought after. They are becoming ever more scarce. Give them a quite sandy soil and water only when dry. They are one of the choicest plants for the window garden. 2 to 2½ inch, 50c. 1 to 1½ inch..... 35c

MOON CACTUS

The vigorous, free growing Eriocereus flower most abundantly. The large showy blossoms opening in the evening and remaining open until late morning. Easy to grow, liking a rich loamy soil and moderate watering. Full sun or semi-shade. 50c and..... 25c

AZTEC COLUMN

A very choice specimen of stately proportions. Cephalocereus polylophus has red blossoms and bears up to 40 ribs. Scarce. Nice plants 2½-3½-inch..... 35c

CACTUS AND SUCCULENTS And How to Grow Them

Well illustrated beginner's book. 68 pages..... 50c

HEDGE HOG CEREUS Echinocereus pentaloophus

It hardly seems possible this small plant could produce such large and brilliant blossoms. The spiny, finger-like stems grow in small clusters and after a good winter rest produce their 3 to 5 inch sparkling blossoms in profusion. They will stand temperatures down to 15 degrees without harm and may be wintered in a quite cool place. 3-year-old clusters, 50c. Smaller..... 35c

PINK MOON CEREUS

This is a lovely free blooming variety with charming pale pink blossoms. Eriocereus Regelli is the only colored one in this group. Stands several degrees of frost. Nice 4-6 inches..... 35c

FRILLED LACE CACTUS

A very charming small cactus bearing 3-inch, deep pink, frilled blossoms. Echinocereus Fitchii is truly a beauty. The white, pectinate spines are tinged with red. The plant is solitary and flowers repeatedly during the summer. It is a favorite of mine. Nice flowering..... 35c

A NEW YORK COLLECTION

"This is my fourth order and all the plants are growing fine. My daughter Joyce enjoys them too. The Christmas cactus at the left was my mother's and is 30 years old." Mrs. Frank Sisteck, Route 3, Dundee, New York.

CEREUS

The Tree Cerei are vigorous plants branching with age. They are nice window garden subjects and in warmer regions may be planted out, growing to 15 feet. They bear delicious tomato-like, sweet fruits.

3 sizes 25c, 35c, 50c.

- Cereus alacriportanus.
- Cereus azureus.
- Cereus caesius.
- Cereus hexagonus.
- Cereus Hildmannianus.
- Cereus horridus.
- Cereus Knuthianus.
- Cereus lepidotus.
- Cereus Llanosii.
- Cereus peruvianus.
- Cereus validus. 50c.

COLLECTION P 19

A grab-bag collection of plants left over from shipping tables. You will get your money's worth.

12 different..... \$1.50

RAINBOW CACTUS

One of the handsomest and freest, dwarf, blooming cacti. Echinocereus melanocentrus is sure to flower and has a long blooming period. Often flower when hardly an inch tall with blossoms larger than the plants! Likes a rich soil, though it should be sandy for drainage. Moderate waterings. Sun or partial shade. Flowering sizes 50c and..... 35c

SNOWBALL CACTUS

The finest haired and whitest of all the Old Man Cacti. *Pseudoespostoa melanostele* is like a ball of white cotton. The long cottony hair entirely clothes even the smallest plant. It is a native of Peru. It grows easily, liking a quite sandy soil, very moderate waterings when dry and an airy sunny window. A very fine plant at a very low price. Specimen 2-inch plants, each, \$1.00. Smaller, 50c and.....

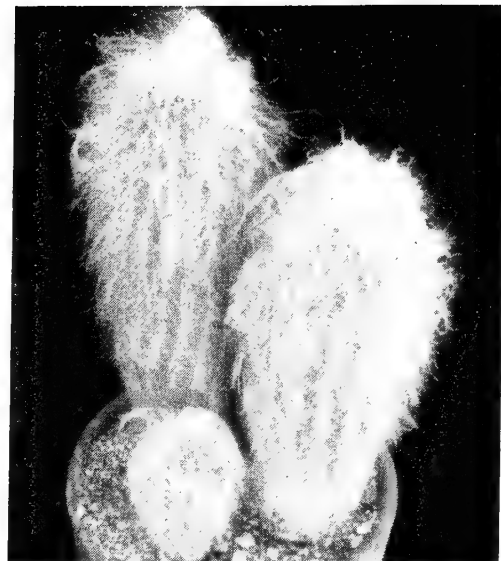

30c

BRAZILIAN ROCK CACTUS

A thoroughly worthwhile cactus for those who like flowers. *Munvillea Cavendishii* blooms with amazing consistency if treated generously. The white blossoms are followed by 2-inch, ovoid fruits, crimson and good to eat. Rich loamy soil, generous waterings, sun or shade. Large 8 to 10-inch, 50c. 5 to 7-inch.....

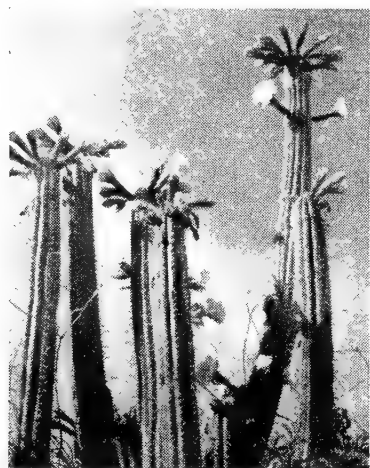

35c

PERUVIAN OLD MAN

This silky, whitehaired Old Man Cactus always attracts attention because of its venerable appearance. It grows somewhat faster than other kinds. *Espostoa lanata* is a Peruvian plant thriving in a sandy soil with moderate waterings. Sun or part sun. Nice plants, 2-2½ inches, 50c. Smaller.....

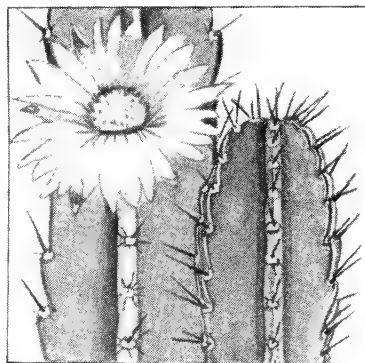

35c

PERUVIAN TORCH CACTUS

A fine easily grown plant liking generous treatment. Bears large snowy blossoms. I took this photograph in Peru in February. It is often pendant from the face of a cliff. Grows rapidly. Hardy at 15° above zero. 4 to 5-inch, 50c. 1½-inch.....

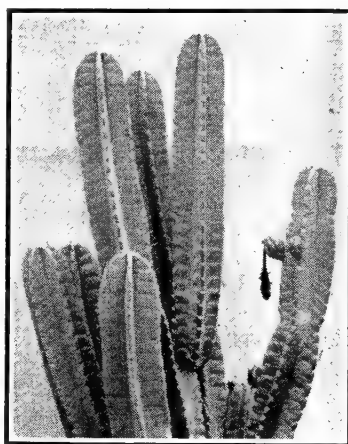

25c

CEREUS MILESSIMUS

A fine tree cactus with snowy blossoms. Delicious red fruits 2 inches in diameter. Fine quick growing pot plant. Nice 7 to 8-inch, 50c. Smaller, 35c and.....

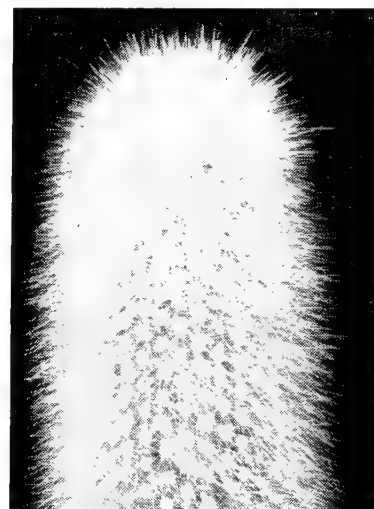

25c

FLOWERING TREE CEREUS

Free flowering and tree-like. *Cereus gonianthus* bears many large red fruits. The sweet crystalline pulp is very pleasant. The fruits of all the Tree Cereus are smooth and spineless. 7 to 8 inches, 50c. Smaller, 35c and.....

25c

SILVER TORCH

The glossy white columns are clothed with soft, silvery spines sometimes tinged red. Flowers tubular, red, very pretty. Clusters freely from base. Well grown specimens are very handsome. Light loamy soil, moderate waterings. Sun or part sun. 6-8 inch, 50c. 3 to 4 inch, 35c. Smaller.....

25c

FLOWERING CACTI

Collection No. S-8

A real window garden of flowering cacti. All are plants that are 3 to 4 years old. Nice 50c sizes that have flowered. We will send budded plants when possible. If other species of the same value are in flower we will send them in place of the listed items below. Tom Thumb, Mamillaria Sartorii, Plaid, Dams Chin, Snow Cups, Rainbow Cushion, Lemon Ball. The 7.....

\$3.00

PERUVIAN APPLE CACTUS

These tree Cerei are very popular. They have 4 to 7 ribs set with brown spines. The flowers of *Cereus peruvianus* hybridus are lily-like, white. The fruits are generally red, large, spineless, tomato-like, but sweet and crisp for eating. They sometimes weigh up to 11 ounces. They make nice pot plants, but in warm regions when planted out grow into tall trees. 7-8 inches, 50c. 4 to 5 inches, 35c. 2 inches.....

25c

CACTUS AND SUCCULENT JOURNAL

Splendidly illustrated. Stories on culture, collecting expeditions, new species. The Journal brings a new world of cacti. Membership and year's subscription.....

AN OKLAHOMA CACTUS COLLECTION

"I bought most of my plants from you. I really enjoy taking care of them. Received them all in fine condition. My children enjoy them, too.

Mrs. Jewett Potts, Tuskahoma, Oklahoma.

ECHINOCACTUS

Fascinating Barrel Cacti

THE BARREL CACTI form a large natural group, including most of those with round or short stems and bearing accordion-like ridges or sometimes chins or nipples. They are found from the United States all the way down to Patagonia. Mexico is particularly rich in the larger kinds. Many bear lovely blossoms, as the Rebutias, Notocacti, Parodias, Chin Cacti, etc. I have described here also most globular kinds, though technically some are more closely related to the Cerei. The pleated effect of the ridged stems, well shown by Bishop's Cap, opposite, allows them to expand rapidly without bursting when the rains fall. The flowers are regular and wheel shaped generally, though not always, borne among the younger areoles at the top. Those bearing nipples often have the flowers on the tips, as does the curious Leuchtenbergia. They grow from sea level to high in the mountains, for in the Andes I found them as high as 14,000 feet, where it is cold even in Summer. The blossoms of these mountain species are of lovely bright colors. It was interesting to find them in such unlikely places. Surprising to me also so high, were the emerald green parakeets. The whole group are most interesting to the fancier. The beauty and symmetry of even the smallest seedling plus their handsome flowers make them unsurpassed.

CULTURE. The greatest number of Barrel Cacti grow readily in the window garden without special care. They like a porous loam soil and I find they all grow well in 2 parts sand, 1 part crumbly loam, 1 part leafmold or our Cactus Compost. A sprinkling of coarse charcoal helps to keep the soil open. When these light soils are used the danger from overwatering is reduced to a minimum. Many of our customers have had remarkable success with our Sand Culture Kit. See page 10. After 40 years of growing cacti I am convinced that very sandy soils and planting with the base at soil level and not buried does away with most cultural difficulties. The beginner should always start this way.

VIOLET SEA URCHIN

A lovely flowered small cactus, blooming profusely during the summertime. The blossoms of Acanthocalycium are particularly bright and shining and the color is most pleasing. Flowers when small, the number of blossoms increasing yearly. Native to Argentina, the plants reaching 4 inches in diameter. Grows easily in light soil with moderate waterings, sun or part sun. Nice flowering 1½-2 inches, 50c. Smaller..... **35c**

ASTROPHYTUM

To this grand group belong some of the most popular and pretty cacti found in Mexico. All are free flowering and are particularly happy in the window garden. They are small or medium size, globular cacti. They are not too choosy but like a sunny location, sandy soil and moderate waterings.

Bishops Cap. Pictured next page.

Four Sided Bishop Cap. A. m. tetragona. This unusual variety is just as free flowering as the 5-sided species. Each..... **35c**

Astrophytum m. columnaris. Much taller and slenderer than the type. 2½-3 inches, \$1. Smaller, 1-1½ inch..... **35c**

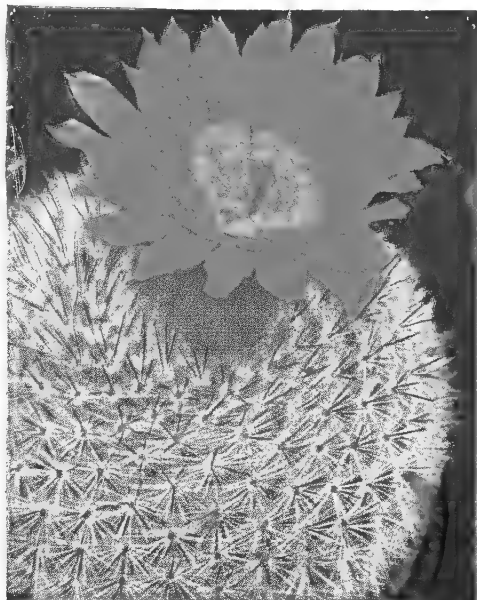

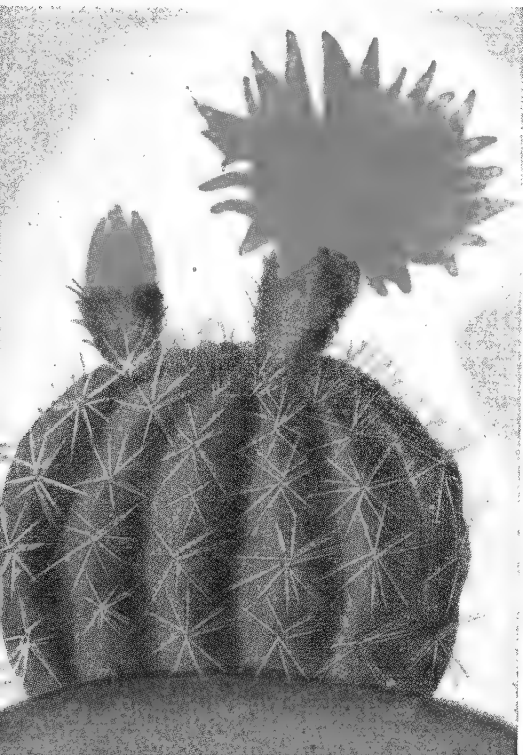

Astrophytum capricorne. The handsomest flowers of all. 3-inch golden blossoms with red eye. Lovely. 1-inch..... **35c**

Astro. capricorne senilis **35c**

Astro. capricorne major, 35c. **Astro. cap. minor** **35c**

INDIAN HEAD

Notocactus Ottonis is remarkable for its long blooming period. The flower buds appear as twists of cocoa-brown fur which swell and burst some morning into glittering yellow blossoms, the red tipped stigma surrounded by minute stamens which roll down tightly when a bee lands in their midst. Easily grown. Blooming size, 50c. Smaller..... **35c**

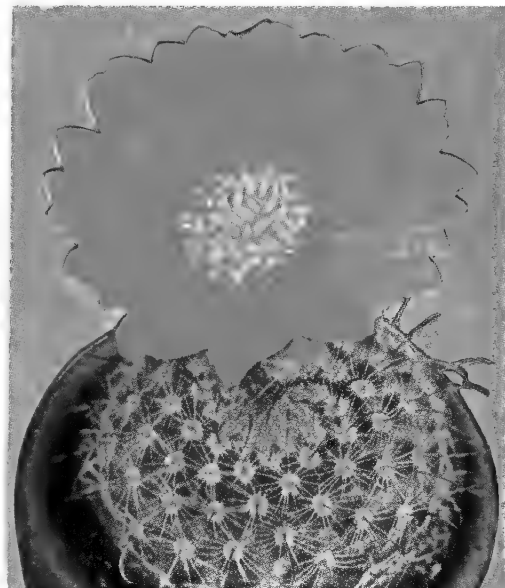

SILVER BALL

An elegant small cactus well pictured above. Notocactus scopas is a native of Brazil. Silvery spines closely set. Every collection should have this charming colorful plant. Flowers lemon yellow, each plant bearing from 6 to 12. The furry buds are brown appearing in a ring about the crown opening in May. Very easily grown. 2-2½-inch, 5 years old, \$1.10. 1½-inch flowering, 85c. Nice 2 to 3 years, 50c and..... **35c**

A RHODE ISLAND CACTUS COLLECTION

The very nice and interesting collection of Mrs. Erwin G. Bissell of Newport, R. I. Cacti are tidy plants and may be safely kept in sunny living room windows. Since they never should be watered till they drip they do not present a danger to furnishings. They add interest and life to any room and are a boon to the apartment dweller during the long winter months.

TOM THUMB

A handsome plant with a lovely flower. Our customers write that it flowers regularly in May and June. Parodia aureispina has golden yellow spine stars with a short hooked central borne on shallow spiralled ribs. In the full sun they assume a rich golden color. A rapid grower in light soil with moderate to generous waterings. Large 4 to 5-year-old specimens, 2½ inches, \$1. 2-year-old, 1½ to 2-inch, 50c. Smaller..... **35c**

PARODIA CHRYSACANTHION

A rare species with lemon yellow, closely set, straight sipens. Makes a beautiful specimen. Very choice. Each 1-1¼ inches..... **50c**

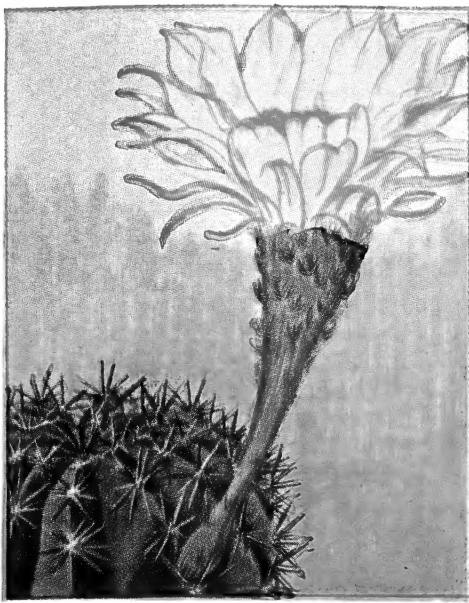

CRIMSON PARODIA

Bears quantities of large bright ruby-red blossoms. A very handsome plant. Flowers freely when small. Slow growing Parodia sanguiniflora is native to the mountains of Argentina. Flowering sizes, 75c, and..... **50c**

RED CROWN

This year I have some very fine three-year-old plants of Rebutia senilis. They are unbelievably floriferous when well grown. I have seen plants with over 100 blossoms. They should be shaded from the noonday sun. Moderate to generous waterings. Large, 50c. Small flowering..... **35c**

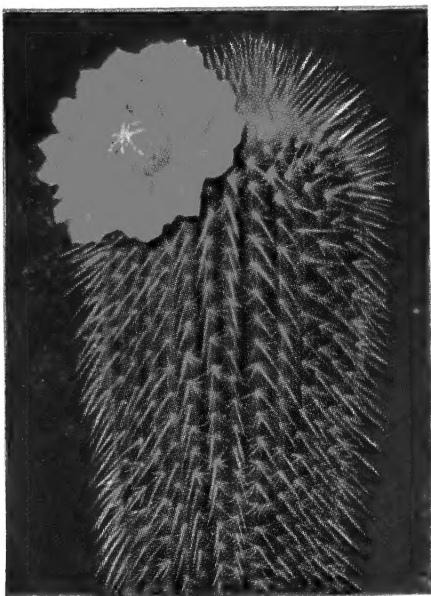

PINK EASTER LILY CACTUS
Echinopsis multiplex (Half Natural Size)

The handsome large pink blossoms of this fine plant are fragrant. It is noteworthy that every plant in the neighborhood will flower on the same day. No beginner would be without it, as it will grow luxuriantly under almost any conditions. Many times there will be 3 or 4 flowers open at once. Moderate to plentiful waterings. Flowering specimens 2½ to 3 inches, 75c. Smaller plants, 35c and..... **25c**

EASTER LILY CACTI

The Echinopsis are old favorites with large Easter Lily-like blossoms, some up to 10 inches. They flower profusely and grow easily and quickly.

BRAIN CACTUS

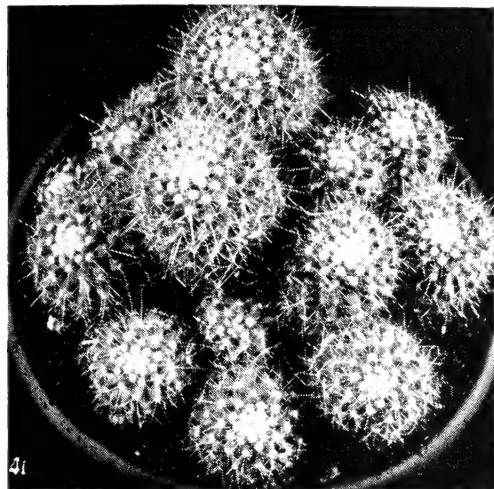

The *Stenocacti* are a very choice group for the window garden. They bear many ribs and flat or stiff papery spines. Young plants look like *Mamillarias*, but shortly develop ribs. Lovely flowers in pink or white often striped purple. Grow easily in a sunny window. 1 inch, each.....

35c

Mamillariás

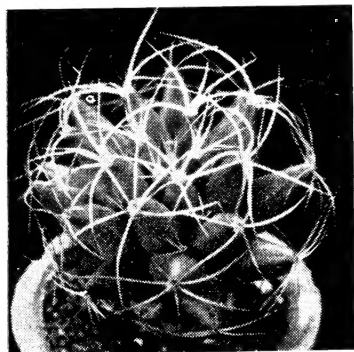

or Pincushion Cacti

AS an old Mamillaria fan perhaps I am prejudiced but I know of no other group of plants that gives one so much pleasure to grow and collect. There are endless varieties and new ones are continually turning up. They are fine for collectors with limited space, for you can grow mature specimens on the window ledge which will flower and fruit yearly. Some are lovely because of the intricate, almost geometrical pattern of their spines and nipples. Others for their bright colored spines in yellow, white, black and red. Some with long white hair or with feathered spines. Some are solitary, others form many headed clusters, others form mounds, the heads so closely compressed as to be hexagonal. Most are native to Mexico, though they are found south to Colombia. They grow from the salty sands of the beaches to the high mountains. Many hide in the scanty shade of the chaparral or cluster on the steep brush clad walls of desert barrancas. The flowers are often lovely in pink red, yellow or white, and some are to be found in bloom at every season. Often the seed pods are brilliant red. Their culture is very simple, liking a sandy loam with some leafmold and sand with a sprinkling of charcoal. Any well lighted window receiving sun is suitable.

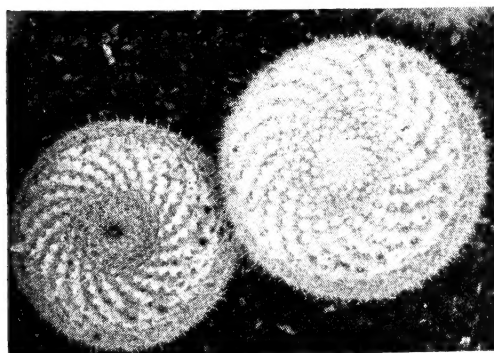

RAINBOW PINCUSHION

A very variable plant, the spines may be red or yellow, but the flowers are always brilliant crimson, opening in fall or spring. A quick easy grower. Mamillaria rhodantha is at first solitary, later becoming clustered. A beautiful specimen plant. Handsome 3-year-old, each, 50c. Smaller, 1-1½ inch..... **35c**

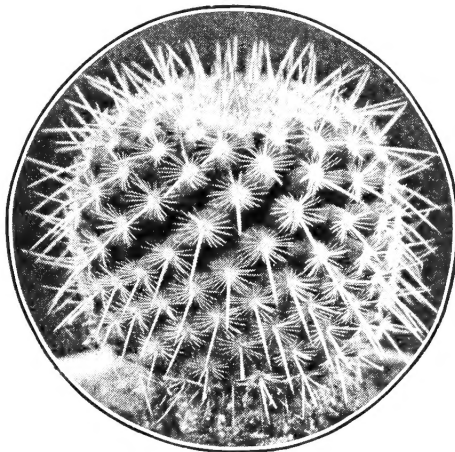

BIRDS NEST

Feathery, curling yellow spines that are papery, soft and harmless. The plant is much given to clustering, young plants pushing out from the sides. Flowers pale yellow. Mamillaria campotricha grows well in sun or shade. Give it a sandy soil and moderate waterings. 2 inch, 50c. Nice, 35c. Smaller..... **25c**

DIADEM CACTUS

Don't fail to have this lovely winter flowering cactus. The bright red flowers are a beautiful crown nestling amongst the white hair and spines. The flowering areoles of Mamillaria Werdermanniana are full of snow white wool. They flower in later winter and always attract the greatest attention among our visitors. Nice plants, 50c and..... **35c**

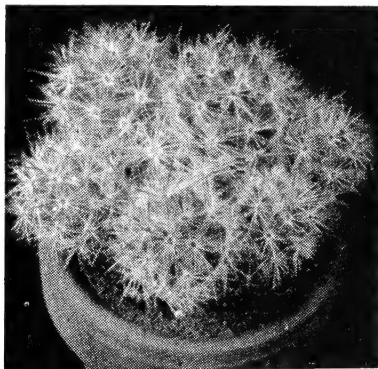

OWLS EYES

A well known plant to fanciers, Mamillaria Parkinsonii has snowy white spines and should be in every collection. It branches by forking. An old easily grown favorite. Bright handsome plants, 35c and..... **25c**
